GENERAL EXAMINATION REGULATIONS

for Bachelor's and Master's degree programmes

valid from 01/10/2024

Important information (disclaimer):

This translation is intended to provide information on examination-related matters to non-German-speakers. Only the German version of the examination regulations is legally binding. Any disputes relating to examination regulations will be interpreted according to the German version and its German legal foundations.

The Academic Senate of SRH University of Applied Sciences Heidelberg adopted the following General Examination Regulations on 30/10/2024.

The Rector agreed to these regulations on 31/10/2024 in accordance with § 32(3) of the Baden-Württemberg State Higher Education Act (LHG) of 1 January 2005 (GBl p. 1), last amended by Article 8 of the Act of 7 February 2023 (GBl pp. 26, 43).

There is no requirement to inform the Ministry for Science, Research and Art of these changes to the General Examination Regulations according to § 70(8) sentence 2 LHG. The changes will be published on the website of the SRH University Heidelberg and on the Learning Management System. (eCampus | Moodle).

A. General Provisions

§ 1 Scope, Objective of Studies and Purpose of Examination

- (1) The current version of the General Examination Regulations is the legal basis for examinations for all Bachelor's and Master's study programmes at SRH University of Applied Sciences Heidelberg in accordance with § 30 (1) in conjunction with § 70 LHG, for all cohorts who began their studies on or after these regulations took effect. These regulations also apply to the cohorts of ongoing study programmes in accordance with the transitional provisions of § 33. **Appendices 1 - 4** are integral parts of the General Examination Regulations for Bachelor's and Master's degree programmes. To clarify the structure, these General Examination Regulations include **sample templates as well as a sample of the Diploma Supplement as an example of** the programme-specific regulations (Examination Regulations of the Study Programmes, Appendix 1 in each case).
- (2) In the Bachelor's programmes, scientific basics, technical, methodological, personal and social competences are taught in accordance with the profile of the university and the programme. The purpose of the examination is to continuously monitor the learning progress until the successful completion of the Bachelor's final examination (see § 22).
- (3) In the Master's programmes, the necessary scientific knowledge as well as technical, methodological, personal and social competences are imparted in accordance with the profile of the university and the programme, building on a first university degree. Students are enabled to apply the knowledge and skills they have acquired in new and unfamiliar situations, to reflect scientifically on complex problems, to solve them in an interdisciplinary manner and to develop them further on their own responsibility. The purpose of the examination corresponds mutatis mutandis to para. (2) sentence 2.
- (4) The programme-specific regulations and special admission requirements for the Bachelor's and Master's programmes are set out in **Appendix 1 (Curriculum, Module Table)**. Together with the General Examination Regulations, these programme-specific regulations form the course-related Study and Examination Regulations in their respective versions. In addition to the successful initial or reaccreditation in the event of changes, the validity of the Study and Examination Regulations (**Appendix 1**) requires the approval of the responsible council.

- (5) For all study programmes with supplementary training and examination regulations that are binding under public law, these regulations in their current version are considered part of the Study and Examination Regulations.

§ 2 Standard period of study, structure and scope of study

- (1) The course of study is divided into semesters. The duration and structure of the programme are regulated for each individual programme in **Appendix 1**. The standard period of study also includes the integrated practical study periods and the examinations, including the final examination.
- (2) The total scope of compulsory and elective modules required for the successful completion of the Bachelor's or Master's programme, as well as the associated study and examination requirements are specified in **Appendix 1**. § 32 (1) applies to the calculation of the total workload of the programme.
- (3) By resolution of the responsible Examination Committee, the **order** of the courses specified in Appendix 1 may be changed in individual cases if there is a valid reason to do so. However, the corresponding number of credit points (credit points = CP) must remain unchanged. The change must be documented.
- (4) Courses and their subsequent examinations of German-language programmes may be held in English for subject-related reasons. The respective programme-specific examination regulations (**Appendix 1**) may provide for corresponding regulations, regarding programmes in English or other languages.

§ 3 Practical Study Period

- (1) All Bachelor's programmes include at least one practical study period (internship). The Master's programmes also include a practical study period if this is stated in **Appendix 1**. Further programme-specific regulations on the type and scope of the practical study periods are contained in **Appendix 1**. In addition, corresponding statutory training and examination regulations in accordance with § 1 (5) apply. Dual and part-time programmes are particularly exempt from the provisions to paragraphs (3) and (4).
- (2) The University shall set up one or more Internship Offices and make regulations on the practical study period in its internship regulations.

- (3) The selection of an internship for the practical study period is the responsibility of the students. The internships are to be proposed by the students and approved by the Head of Department or by a qualified academic staff member; in cases of doubt, the competent Department Examination Committee will make the final decision. Exceptions to this rule are listed in **Appendix 1**.
- (4) A practical study period should only be started if the coursework and examinations of the preceding standard study modules have been successfully completed. In accordance with § 15, the responsible Examination Committee decides on the minimum coursework and examination achievements that must be completed in order to properly carry out the practical part of the course.

§ 4 Examination structure

- (1) The Bachelor's examination is the entirety of all examinations within the Bachelor's study programme. It consists of module examinations and sub-module examinations and, if applicable, coursework in accordance with § 7b. **Appendix 1** specifies these examinations and their allocation in blocks or semesters during the standard period of study. The same applies to the Master's examination as detailed in **Appendix 1**. Examinations are usually taken in the same term as the courses they are assessing and are related to the material in these courses. Students are automatically registered for all regular examinations (examination schedule in the standard period of study in accordance with **Appendix 1**). Students must register independently for make-up or repeat examinations; § 13 (1) applies accordingly to the registration and deregistration procedure for make-up and repeat examinations.
- (2) At the end of the Bachelor's or Master's examination, the students must demonstrate their ability to conduct independent academic work within a set timeframe by the preparation of a final thesis. § 22 et seq. and the applicable **Appendix 1 shall apply**.
- (3) Credit points are assigned to each successfully completed module, cf. § 10 (7). The total amount of credit points for each Bachelor's and Master's programme, as well as the distribution of credit points among the module examinations are **specified in Appendix 1**.
- (4) **Appendix 1** may specify the ungraded coursework assigned to each mandatory and elective section and the associated classes.

- (5) A module usually concludes with an examination. This examination may consist of partial examinations as outlined in § 10 (3).

§ 5 Loss of admission to the programme; Deadlines

- (1) Students will be informed in a timely manner about the type and scope of required coursework and the module examinations to be completed, along with the dates by which they must be finished. Students will be informed in advance of the possible make-up dates for each module examination. § 13 of these Regulations applies specifically for make-up or repeat examinations.
- (2) Examination eligibility and admission to the programme are revoked if all examinations for the Bachelor's or Master's degree are not completed within six semesters after the end of the standard programme duration specified in the applicable **Appendix 1** unless the student is not responsible for exceeding the deadline (§ 32 (5) LHG). If the University has agreed upon an individual schedule with the student (e.g. for student athletes, students with disabilities, students with children), the aforementioned deadline can be extended by a maximum of three semesters (§ 30 (3) sentence 2 LHG). § 32 (5a) LHG is to be observed in case of delays according to this paragraph.
- (3) Students are not responsible for exceeding deadlines due to compliance with the protective provisions in accordance with the Maternity Protection Act, or due to compliance with the statutory provisions on parental leave and the Care Leave Act (§ 32 (3) and 4 LHG).

§ 6 General Admission Requirements for the Bachelor's or Master's Examination

- (1) The Bachelor's examination (cf. § 4 (1)) can only be taken by a person who
1. is duly enrolled in the Bachelor's programme at SRH University on the basis of a university entrance qualification in accordance with § 58 LHG,
 2. has completed a pre-study internship, if required,
 3. has successfully completed all generally required coursework (§ 7b (1)) and the coursework or admission requirements listed in **Appendix 1** (Module Tables for Study Programmes) or in the module handbooks for the respective module examinations and sub-module examinations.

(2) The Master's examination can only be taken by a person who

1. is duly enrolled in the Master's programme at SRH University on the basis of a university degree or equivalent degree in accordance with § 59 LHG,
2. has qualified professional experience of at least one year for the occupational studies Master's programme (§ 59 (2) LHG),
3. has successfully completed all generally required coursework (§ 7b (1)) and the coursework or admission requirements listed in **Appendix 1** (Module Tables for Study Programmes) or in the module handbooks for the respective module examinations and sub-module examinations.

§ 7 Examinations, Compensation for Disadvantages

- (1) The Bachelor's and Master's examinations as well as the individual module examinations aim to assess the competences acquired in the modules. The examinations (§ 4 (1)) are usually completed within the respective semester of the course (in the examination forms according to § 7a and **Appendix 3**) unless **another examination schedule is provided for** in Appendix 1.
- (2) If students can credibly demonstrate that they are in a special life situation, in particular students with disabilities, chronic illnesses, on maternity leave, with children or relatives in need of care, and that these circumstances prevent them from completing examinations entirely or partially under the conditions provided, the responsible Examination Committee (in accordance with § 15) may approve compensation for disadvantages, such as allowing examinations to be taken with extended time (application for compensation for disadvantages). For this purpose, the submission of a medical certificate may be required. The same applies to coursework requirements. A representative of the university is available to advise students with physical impairments.
- (3) In cases other than those provided for in para. (2), the Department Examination Committee may, after careful consideration of the individual case, permit the examination to be completed under adjusted conditions, such as extended examination period. The same applies to (mandatory) coursework.

- (4) Notwithstanding paragraphs (2) and (3), the responsible Examination Committee may change an existing form of examination into an equivalent form of examination before the start of the module if this is deemed necessary due to special circumstances or the content to be examined. The change must be announced and documented in good time after the decision has been made and before the start of the respective module. The same applies for online examinations in accordance with § 9b, provided that they are equivalent to the existing form of examination in terms of type and scope and the framework conditions for the proper conduct of the examination are ensured.

§ 7a Examination Formats, Online Examinations

- (1) The permissible forms of examination in Bachelor's and Master's programmes are **listed and defined in Appendix 3** to the General Examination Regulations. **Appendix 3** is an integral part of these General Examination Regulations.
- (2) Online examinations are examinations conducted using electronic information and communication systems. Written, oral or practical online examinations conducted under video supervision, can be carried out in accordance with §§ 8 (1a) and (9b). The participation in examinations according to sentence 2 is voluntary, provided they are not conducted on the premises of the university or in test centres, until the start of the examination. Voluntary participation is ensured in particular by offering simultaneous or alternative dates for the examination on site, to the extent permissible by law.
- (3) Subject-specific practical assignments that are created with the help of a computer application on site at the university or in a test centre are not classified as online examinations. The provisions of §§ 7b - 9b remain unaffected.

§ 7b Coursework

- (1) Coursework generally consists of the obligation to actively participate in on-campus courses. This includes, among other elements, completing independent study tasks, actively participating in group work and fulfilling other assignments.
- (2) In addition to para. (1), the specific (mandatory) coursework required are outlined in **Appendix 1**. (Mandatory) Coursework constitutes ungraded academic achievements that can be repeated as often as necessary within the time limits of § 5.

§ 8 Oral examinations, oral online examinations

- (1) Through oral examinations, students demonstrate the competences acquired in the module in oral form in an examination setting. The examination must be targeted to the competencies acquired in the module.
- (1a) Upon a justified request of a student, an oral examination pursuant to **Appendix 3** may be conducted as an oral online examination, provided that there are no advantages or disadvantages compared to an examination in person. The responsible Head of Study Programme may, in consultation with the examiners concerned, approve the conduct of an **oral examination provided for in Appendix 1** in the form of an online examination. For approval, it must be ensured that all examinees have access to sufficient technical resources and have had sufficient opportunity to familiarise themselves with the communication platform used (the university's recognised examination system) before the start of the examination. Additionally, measures must be taken to ensure equal opportunities and to prevent deception (identification, examination protocol, preparation checklists for students and examiners). The processing of personal data, in particular the transmission of audio and video recordings of the examination and the information required for the identification of the examinee, is permissible within the framework of the examination process. The data is deleted in accordance with the legal regulations (§ 32a (6) LHG) and the university's specific regulations for the storage of examination documents.
- (2) Oral examinations are usually taken in front of at least two examiners (panel examination) or in front of an examiner and one observer (§ 16) as an individual or group examination. Deviations from this standard are decided on by the responsible Examination Committee based on the design of the examination forms (**Appendix 3**).
- (3) The duration of the oral examination is generally 20 minutes per candidate and subject to be examined but must at least 10 and no longer than 30 minutes. An oral examination as part of the final examination (Bachelor's or Master's examination) usually lasts 30 minutes, unless **otherwise specified** in Appendices 1 and 3.
- (4) The essential subjects and results of the oral examinations must be documented in a written record. The result is announced to the examinee at the end of the oral examination. In the case of the panel examination, the grade of the examination is determined by the arith-

metic average of the individual assessments of the examiners (for the assessment of examination performance, see § 10).

- (5) Students who plan to take the same module examination at a later examination date (in a different cohort) may be admitted as observers unless the examinee or the examination authority objects. Observers are not permitted to be present during the consultation and announcement of the examination results.

§ 9 Written Examinations, Study Papers and Other Written Examinations

- (1) In the written examinations, study papers and other written examinations, students demonstrate the competences they have acquired in the module. In particular, they should be able to solve tasks and discuss topics using the common methods of their subject. It is also to be determined whether they have the necessary basic knowledge and expertise. There may be a choice of topics. The examination should be aligned with the competences aimed at in the module.
- (2) Written examinations usually last 90 minutes, unless otherwise specified in **Appendix 1**. As a rule, students have four weeks to write student papers; deviating regulations, also for other written examinations, are made in **Appendix 1**, taking into account **Appendix 3**. In order to ensure equal opportunities, written exams and similar written examinations should be completed anonymously, with students using their matriculation number instead of their names. Examiners will assess the submissions accordingly.
- (3) Admission to the respective examination may be combined with the student's regular attendance of the corresponding course, regulations for this are specified in Appendix 1 in accordance with § 7b.

§ 9a Practical Examinations

- (1) In the **practice-oriented forms of examination listed in Appendix 3**, students are required to show, through the practical implementation of a task, the extent to which they have acquired the competences targeted in the module.
- (2) More detailed regulations on the individual forms of examination and their assignment to a module examination are made in **Appendix 3** and in **Appendix 1**. Students must be informed of the design and implementation of these forms of examination in a timely manner before the examination.

§ 9b Implementation Regulations for Online Examinations

- (1) An online examination is permissible if it is suitable for demonstrating the extent to which the examinees have achieved the learning objectives of the module.
- (2) The examinees will be informed about the manner in which the examination will be conducted in an appropriate manner before registering for the examination and will be given the opportunity to familiarise themselves with the examination system in advance. The conditions of the examination process are the same for all examinees. All examination tasks are equivalent in terms of content and level of difficulty. Students will be informed, in accordance with § 32a (3) LHG, about the examination conditions for the online examination, in particular about the deadline for a possible withdrawal from the examination.
- (3) Before the start of an online examination under video supervision, examinees must prove their identity upon request, in particular by showing an official photo ID or a student ID with a photo. The online examination must be carried out under the supervision of a technically informed person within the meaning of § 32a (5) LHG. A record of the examination must be kept, including the names of the record takers and the examinees, the start and end times of the examination, and any noteworthy incidents.
- (4) It must be ensured that the electronic data of an examination can be clearly and permanently assigned to the person examined. It is ensured that the examination records or examination documents remain unchanged and complete after the completion of the examination and are protected against manipulation or loss. § 32a (6) shall apply accordingly to data processing for online examinations.
- (5) If it can be proven that the transmission of the examination tasks, the processing of the examination tasks, the transmission of the examination performance or the video supervision is not technically feasible at the time of the online examination under video supervision, the examination will be terminated at the respective stage and the attempt will not count. If the audio or video transmission is demonstrably temporarily (briefly) disrupted during an online examination under video supervision, the examination will continue once the disruption is resolved. However, if the technical malfunction continues, so that the examination cannot be continued properly, sentence 1 applies accordingly (§ 32b LHG). If the connection is lost during the examination, the examinees and examiners are obliged to contact each

other immediately via alternative means of communication. For this purpose, appropriate contact numbers should be exchanged or agreed upon before the start of the examination.

§ 10 Assessment of Examinations

- (1) The following grades are to be used for the evaluation of the examination performance, unless they **are to be assessed as "passed" or "failed"** by the specifications of the course-specific Appendix 1:

Note	Prerequisite	Decimal value
Excellent	An exceptionally good performance	1.0 to 1.2
Very good	A significantly above-average performance	1.3 to 1.5
Good	An above-average performance	1.6 to 2.5
Satisfactory	A performance that meets average requirements	2.6 to 3.5
Sufficient	A performance that fulfils the expectations despite some deficiencies	3.6 to 4.0
Insufficient	A performance that does not meet expectations due to serious deficiencies	5.0

- (2) Grades with decimal values from 1.0 to 5.0 are awarded for the evaluation of examinations (including module examinations and Bachelor's or Master's final examinations). Between 1.0 and 4.0, all decimal values with one digit behind the decimal mark can be used. In cases where an examination is assessed by several examiners (usually panel examinations), the final grade is calculated from the arithmetic average of the individual grades given by the examiners.
- (3) If an examination consists of several partial examinations, each partial examination should be assigned a number of points. The grade for the examination is then calculated from the sum of the points in the partial examinations.
- (4) The passing grade for all examinations is usually 50% of the maximum achievable number of points when a numeric scale is applicable. Scales deviating from this must be justified. The weighting of each task must be clear to the examinees.
- (5) For the calculation of the final grade (§ 27), the grades of the individual examinations together with their weighing (usually according to credit points in accordance with para. (7))

are to be considered. If the weighting differs from the credit points assigned to each module, the weighting specified in the module table (**Appendix 1**) will apply.

- (6) When calculating the average, only the first decimal place after the decimal point is considered; all further digits will be deleted without rounding.
- (7) To promote international comparability and transparency as well as to support national and international student mobility, credit points (CP) determined in accordance with the European Credit Transfer System (ECTS) (resolution of the 98th Senate of the German Rectors' Conference of 10/02/2004, section 3) are assigned to each successfully completed module. In addition, § 32 (1) applies.
- (8) In the course of the further development and transparency of European higher education, the university prepares, an overview of the final grades awarded for each study programme (ECTS grading tables, see model supplement to the appendix) in accordance with section 4.3 of the 2015 ECTS Guidelines. This gathers all grades awarded within a specific reference group over a period of two academic years.

§ 11 Absence, withdrawal, deception, violation of regulations

- (1) If a student misses an examination or leaves before completing it without good cause, the examination will be graded as "insufficient" (5.0). The same applies if an examination is not completed within the specified processing time.
- (2) The reason given for missing, leaving or not completing an examination within the specified processing time must be documented and reported to the Examination Office (§ 15a) immediately in writing and must be substantiated. In the case of illness, the submission of a medical certificate of inability to take an examination and, in cases of doubt, a corresponding report from a specialist may be required. If the reason is recognised as valid, the examinee is granted a new examination attempt or an appropriate extension of the deadline. The responsible Examination Committee rules on the validity of the reasons in accordance with § 15. If the module examination consists of several partial examinations, the examinations already successfully completed are to be credited.
- (3) If a student attempts to influence the result of their examination through deception or by using forbidden aids, the examination is graded "insufficient" (5.0). Anyone who disrupts the

orderly conduct of the examination can be excluded from continuing the examination by the respective examiner or invigilator; in this case, the examination is graded "insufficient" (5.0). In repeated or very serious cases, the Examination Committee can exclude the candidate from further examinations. § 29 (1) applies for cases of deception discovered after the certificate is awarded. If there is a substantial suspicion of deception during the evaluation of theses, study papers or other written or practical assignments, the relevant Examination Committee may decide that a hearing should be held immediately to determine whether a deception attempt occurred.

- (4) An appeal against decisions pursuant to para. 3 are permissible in accordance with § 20 (3) of these regulations.

§ 12 Passing and Failing Examinations

- (1) A module examination is passed if it has been graded at least "sufficient" (4.0) or "passed".
If a module examination consists of several examinations, the module examination is only passed if each examination was graded at least "sufficient" (4.0) or "passed".
- (2) The Bachelor's examination is passed if all module examinations of the Bachelor's examination have been passed, the practical study period has been successfully completed and the Bachelor's thesis has been graded at least "sufficient" (4.0). The same applies to the Master's examination, if a practical study period is planned.
- (3) If a module examination is not passed or the Bachelor's or Master's final examination is graded below "sufficient" (4.0), the student will be informed about whether and, if so, to what extent and within what timeframe the module examination or the Bachelor's or Master's final examination can be repeated. Examinations that must be passed as a condition to continue the programme will be assessed by two examiners if the last repeat examination was failed.
- (4) The Bachelor's or Master's examination is considered definitively failed if all permitted examination attempts under these regulations have been exhausted, at least one examination has been failed for the last time and no appeal proceedings are ongoing against the corresponding examination notice. Sentence 1 applies accordingly if the deadline under § 5 (2) has expired.

§ 13 Repetition or make-up of module examinations

- (1) Failed module examinations may be repeated twice. Repeating a passed module examination is not permitted. The procedure for completing or repeating module content is explained in **Appendix 2**. Students must register for repeat and make-up examinations independently. In their Department Examination Committees (DEC), the Schools determine the procedure and the deadlines by which students can register and deregister for a repeat or make-up examination. If no such deadline is specified, deregistration can be made up to one week before the examination date at the latest. § 5 (2) applies to the timely completion of examinations in accordance with the relevant course-specific examination regulations (**Appendix 1** to these regulations).
- (2) In the cases referred to in § 12 (1) sentence 2, only the individual examination that has not been graded at least "sufficient" (4.0) shall be repeated.
- (3) Repeat or make-up examinations should be taken at the latest within the examination period of the following semester. If the deadline for conducting the repeat or make-up examinations (cf. § 5(2)) is missed, the right to take the examination expires, unless the student is not responsible for the delay.
- (4) By attending subject-specific academic counselling, students may be granted one additional examination attempt beyond the repetition attempts specified in para. 1. The informal application must be submitted to the responsible Examination Office within one month of the announcement of the repeat examination results. If the deadline is missed through no fault of the student, they are entitled to be returned to the previous status. Paragraph (3) applies accordingly.

§ 14 Recognition of Coursework and Examinations, Recognition of External Achievements

- (1) Coursework and examinations will be recognised without an equivalence review if they were completed at a university in the Federal Republic of Germany in the same or a similar study programme.
- (2) Coursework and examination achievements not covered in para. 1 will be recognised unless significant differences can be proven and justified, and the content, scope and requirements of study and examination achievements are essentially equivalent to those of the study

programme for which recognition is sought. This does not require a detailed comparison, but rather an overall evaluation of the importance of the completed coursework, examinations etc. for the objective of the study programme. If the university is unable to provide proof of significant differences, the periods of study, coursework and examination achievements must be recognised.

(3) Relevant practical study periods (§ 3 (1)) and professional experience will be credited. For achievements at other institutions (e.g. outside the higher education system, in accordance with § 35 (3) LHG), **Appendix 4**, § 4 shall apply accordingly. Further details, in particular whether, under what conditions and to what extent the knowledge and skills acquired outside the higher education system can be credited, are regulated by the **Recognition and Crediting Regulations** of SRH University of Applied Sciences Heidelberg (**Appendix 4**). The Recognition Regulations may also provide for a placement exam and are an integral part of the Study and Examination Regulations.

(4) As a rule, the Department Examination Committee decides on the recognition or credit transfer within four weeks, but no later than two after a complete application has been submitted. The student submits an application to the Department Examination Committee in accordance with **Appendix 4**, § 3 on recognition of coursework and examinations. The responsibility for providing sufficient information lies primarily with the applicant. The burden of proof that an application does not meet the relevant requirements lies with the Department Examination Committee. If the crediting or recognition is refused or no decision is made, an appeal can be filed.

(5) In addition to paragraphs (1)-(4), **Appendix 4** of these Regulations (**Recognition Regulations**) applies. In case of doubt, more specific provisions contained therein take precedence over the aforementioned provisions.

§ 15 Examination Committee (EC)

(1) The Examination Committee (EC) is a body of the School that is responsible for the organisation of the Bachelor's and Master's examinations of all study programmes assigned to the School as well as for the other tasks assigned by these regulations. A School must set up a **Department Examination Committee (DEC) for each department** to adequately evaluate and decide on subject-specific examination-related matters. If there are several DEC's in a school, the chairs jointly form a superordinate **School Examination Committee (SEC)**. The

committee elects a chair and deputy from among its members. In addition to monitoring the uniform application of these examination regulations, the SEC's tasks include in particular the exercise of the right of initiative as per § 15b (3).

- (2) The DEC consists of at least five members of the full-time academic staff in accordance with § 44 (1) LHG, the majority of whom are professors. One student member, as well as other members as needed, are elected by the Council. The chairperson and their deputy, who must both be professors, are elected during the DEC's constituent meeting upon the proposal of the Academic Director. The Academic Director is not eligible for this role. The chairperson usually conducts the business of the DEC. One employee of the School's Examination Office serves as advisory member of the Examination Committee in accordance with § 15a and is automatically assigned.
- (3) The DEC passes its resolutions by a majority of the valid votes cast; abstentions count as no vote; in the event of a tie, the vote of the chairperson decides. The DEC has a quorum if the majority of its members are present, and the chairmanship is guaranteed. The DEC or the office of the Examination Office responsible for this purpose keeps the examination files.
- (4) The term of office of the elected members is three years, in the case of the student member one year. Re-election is permitted. In the event of an early resignation of a member, the new member's term corresponds to the remaining term of office. The Council decides on replacements if deputies are unavailable.
- (5) The members of the DEC and their deputies have the right to sit in on examinations. They are subject to official secrecy and are sworn to this obligation by the chairpersons upon taking office.
- (6) The DEC is responsible for monitoring compliance with the Study and Examination Regulations. It reports to the Council on the development of examination and study durations, including on the actual timeframe required to complete Bachelor's and Master's final examinations, as well as on the distribution of subject-specific and overall grades. The DEC can make suggestions for reforms of the curriculum and of the Study and Examination Regulations. In particular, it is responsible for decisions on:
 1. the consequences of violations of examination regulations (§ 11),
 2. passing and failing examinations, including final failure (§ 12),

3. the appointment of examiners and assessors (§ 16),
4. the deadlines and the procedure for repeat examinations (§ 13(1)),
5. the recognition of (reasons for) deadline extensions (in particular § 5(2)),
6. the decision on the recognition of prior study periods and examinations in accordance with § 14 and **Appendix 4**,
7. the granting of compensation for disadvantages (§ 7(2), (3)).

The DEC can delegate individual tasks to the chairperson. This does not apply to cases arising from points 1, 2, and 5 of this paragraph, or to decisions that result in the termination of a student's studies.

§ 15a Examination Office (EO)

- (1) To provide administrative support and ensure the organisational implementation of the Study and Examination Regulations, each Department Examination Committee (DEC) is assigned a contact person from the Examination Office. In coordination with the DEC, the Examination Office plans the implementation of the Bachelor's and Master's examinations, informs the students about examination dates and reports to the DEC.
- (2) The EO also has the following responsibilities:
 1. Providing technical advice to the Schools on modelling issues when developing proposals to amend **Appendix 1** (programme-specific regulations),
 2. Issuing graduation documents and their replacements or verification,
 3. Preparing examination and student statistics required for official purposes.

§ 15b University Examination Committee (UEC)

- (1) On behalf of the Academic Senate, the University Examination Committee (UEC) prepares proposals for the ongoing development of these regulations and the procedures to be derived from them. The UEC consists of the Vice-Rector of SRH University of Applied Sciences Heidelberg as Chair, the Head of the Examination Office of the University (EO-U) and the Chairs of each SEC. In the constituent meeting of the UEC, a deputy chairperson is to be elected from among its members. The UEC has a quorum if at least half of its members, in-

cluding the chairperson or deputy chairperson, are present. It decides by a majority of the members present. In the event of a tie, the vote of the chairperson shall be decisive. The chairperson may consult the Academic Head of Examination Affairs and other university members in an advisory capacity as required. The Academic Senate may appoint up to three members to the UEC in an advisory capacity as required.

- (2) The UEC's primary responsibility is to ensure the consistent application of these General Examination Regulations across all schools. It prepares proposals for resolutions on amendments or additions to these regulations for the Academic Senate. It decides on the invalidity of the Bachelor's or Master's examination in accordance with § 29. The UEC can delegate certain tasks to the Chair.
- (3) Proposals aligned with internal university departments, as specified in para. 2 sentence 2, must be submitted in text form by the chairperson of the respective SEC to the Chair of the UEC in writing no later than 90 days before the start of the academic year (01/10).

§ 16 Examiners and assessors

- (1) As a rule, only university lecturers as defined in § 44 (1) No. 1 LHG and academic staff who are commissioned to independently perform tasks in research and teaching are authorised to conduct examinations. Honorary professors, visiting professors and lecturers (§ 44 (2) no. 1, 3 and 5 LHG) as well as other academic staff (§§ 44 (1) no. 2, 52 LHG) may be appointed as examiners if university lecturers or academic staff authorised to conduct examinations in accordance with sentence 1 are not available as examiners.
- (2) Examinations are typically conducted by those responsible for the respective courses. The responsible DEC appoints the examiners and assessors as needed. The names of the examiners are to be announced in good time. Assessors monitor and document the examination process, but they are not allowed to audit or evaluate the examination.
- (3) Examiners and proctors must possess at least the qualification to be assessed by the examination or an equivalent qualification. This provision applies accordingly to individuals with exceptional professional experience in practice and training, who may not hold formal qualifications but demonstrate outstanding practical expertise.
- (4) Official secrecy in accordance with § 15 (5) applies to the examiners and the assessors.

§ 17 Protective provisions under the Maternity Protection Act (MuSchG), the Parental Leave Act (BEEG) and the Home Care Leave Act (PflegeZG)

- (1) The use of the protective provisions in accordance with §§ 3, 4 and 6 of the MuSchG (Maternity Protection Act of 23 May 2017 (Federal Law Gazette I p. 1228), last amended by Article 57 (8) of the Act of 12 December 2019 (Federal Law Gazette I p. 2652)) and in accordance with the terms of the BEEG (Federal Parental Allowance and Parental Leave Act in the version published on 27 January 2015 (Federal Law Gazette I p. 33), most recently amended by Article 7 of the Act of 27 March 2024 (Federal Law Gazette 2024 I No. 107)) in the applicable version on parental leave and §§ 2, 3 and 4 of the PflegeZG (Care Leave Act of 28 May 2008 (Federal Law Gazette I pp. 874, 896), last amended by Article 2 of the Act of 19 December 2022 (Federal Law Gazette I p. 2510)) in the current version is made possible, provided that the students concerned comply with their obligation to provide information in good time.
- (2) The competent authority of the School, upon receiving such information, prohibits the participation of pregnant or nursing students in courses that pose significantly above-average risks for mother and/or child. The Department Examination Committee determines whether and how pregnant or nursing students can otherwise acquire the knowledge and skills taught in courses in which they are not allowed to participate. However, there is no legal entitlement to the provision of a special course for pregnant or nursing students. Notification of this exclusively in electronic form is sufficient.

§ 18 Leave of Absence and Examinations

- (1) Students who are demonstrably prevented from completing their studies properly during a semester can apply for a leave of absence in accordance with the current version of the Admission and Enrolment Regulations.
- (2) During the leave of absence, students are usually not allowed to attend courses, complete examinations or fulfil other academic requirements. Exceptions, particularly in cases of illness or in periods of protection under § 17, may be granted by the responsible DEC upon application.
- (3) Examination periods that were duly started before a leave of absence or termination of a contract do not automatically expire due to the leave of absence or contract termination.

§ 19 Objections to examination procedures

- (1) Deficiencies in the examination procedure or disruptions during the examination must be recorded with the examiner or the person responsible for examination supervision immediately after becoming aware of them. If the reported deficiencies are not remedied immediately, they must be reported to the Examination Office immediately after the examination, which will forward the objections to the Department Examination Committee (DEC) for a decision.
- (2) If it is determined that the examination procedure contained significant deficiencies that may have influenced the examination result, the DEC decides on the validity of the examination and on any rescheduling. The persons concerned are given the opportunity to be heard before a decision is taken.
- (3) In accordance with § 20 (1), students are entitled to access to examination records upon application (informal) to the Examination Office after completion of the assessment of the examination performance.

§ 20 Inspection of the examination records, remonstrations, and appeals procedure

- (1) Within one year of the conclusion of the examination procedure, as indicated by the announcement of the grade, the examinee may request access to their written examination papers, the related marks or expert opinions and the examination records. As a rule, only the student's own examination documents may be viewed.
- (2) Students can submit a written remonstrations to the responsible DEC within a period of two weeks after viewing the examination records. The application must include a detailed justification. A review of the assessment will only be considered if it can be sufficiently demonstrated in which points the original evaluation was erroneous and to what extent this was relevant for the awarding of grades. The applicant must be informed of the result of the reconsideration.
- (3) Appeals regarding examination matters are admissible within one month of the student being notified of the examination decision. The appeal must be submitted to the responsible DEC or to the Vice Rector for Student Affairs. If the DEC does not remedy the objection,

the Vice Rector for Student Affairs issues an objection notice. This must be accompanied by instructions on legal remedies and communicated to the student.

§ 21 Attendance requirement

- (1) Attendance is not generally mandatory.
- (2) SRH University of Applied Sciences Heidelberg emphasises the personal responsibility and self-determination of its students. If attendance is deemed indispensable for specific courses due to the didactic concept or content requirements, the responsible Department Examination Committee decides on this at the request of the HoSP. Compulsory attendance will be communicated in good time at the start of the module. § 7b (Academic achievements) remains unaffected by this provision.

B. Bachelor's or Master's final examination

§ 22 Purpose and Conduct of the Bachelor's or Master's Final Examination

The Bachelor's or Master's final examination, together with all successfully completed mandatory and elective courses, constitutes the professional qualification for the respective study programme. The final examination serves to determine whether the student has acquired an overarching understanding of the subject, the ability to apply academic methods and insights, and the comprehensive specialist knowledge necessary for the transition to professional practice.

§ 23 Admission Requirements for the Bachelor's or Master's Final Examination

- (1) Appendix 1 specifies the type and number of examinations that must be completed as a prerequisite for admission to the final examination.
- (2) In the absence of such a provision, as a rule, no more than three examinations should generally remain incomplete before the respective final examination is commenced by releasing the subject of the final thesis.

§ 24 Type and Scope of the Bachelor's or Master's Final Examination

- (1) Appendix 1 specifies the scope (workload) and processing period for the Bachelor's or Master's final examination. The standard form of examination, as outlined in Appendix 3, is the thesis. Deviations from this format can be made based on the specifications in Appendix 1.
- (2) In addition to the chosen thesis topic, the final examination may cover material from related fields, insofar as these are part of the curriculum of the study programme as outlined in the applicable Appendix 1. § 22 applies accordingly.

§ 25 Release and Processing Time of the Bachelor's or Master's Final Examination

- (1) With the final academic examination of the study programme, students demonstrate their ability to engage independently with a topic at a scientific level. The students submit topic proposals and apply for their approval.
- (2) The topic of the Bachelor's or Master's thesis must be approved no later than three months after the completion of all module examinations. The approval is given by the Academic Di-

rector, who can delegate the decision to the responsible Head of Study Programme. The subject and date of approval must be documented. For early topic registrations or approval, § 23 also applies.

(3) The Bachelor's or Master's thesis shall be supervised by an examiner as specified in § 16 (1) sentence 1. Honorary professors, visiting professors and lecturers (§ 44(2) no. 1, 3 and 4 LHG) as well as academic staff (§§ 44(1) no. 2, 52 LHG) can be appointed as supervisors when no university lecturers are available and when they work in an area relevant to the respective study programme. The Bachelor's or Master's final examination can also be supervised by professionals with substantial experience in practice and training who themselves have at least the same qualification to be assessed or an equivalent qualification. Cooperation with an external examiner must be approved by the Chair of the Department Examination Committee (DEC). The same applies if the Bachelor's or Master's final examination is to be carried out in an institution outside the university.

(4) The Bachelor's or Master's final examination may also be completed as a group project if the individual contributions are clearly distinguishable and assessable on the basis of the indication of sections, page numbers or other objective criteria that enable a clear delimitation and meets the requirements outlined in para. 1.

(5) The processing time for the Bachelor's or Master's final examination is specified in **Appendix 1**. In accordance with the guidelines of the Standing Conference of the Ministers of Education and Cultural Affairs, this is based on the credit points (CP) to be awarded for this purpose. Insofar as this is necessary to ensure equal examination conditions or for reasons beyond the control of the student, the processing time may be extended by the period of the substantiated impediment. The DEC decides on such extensions based on a statement by the supervisor.

§ 26 Submission and Evaluation of the Bachelor's or Master's Final Examination

(1) The Bachelor's or Master's final examination must be submitted on time to the Examination Office, but no earlier than one month before the submission deadline. The date of submission must be recorded in the file. If it is not possible to submit the submission on time, the student must immediately apply for an extension corresponding to the substantiated period of illness or prevention (§ 11 (2)). The total extension of the submission period, according to Appendix 1, should not be extended by a maximum of 50% of the original processing time.

The Department Examination Committee (DEC) decides on the approval and its scope in accordance with § 15 (6) No. 7. When submitting, students must provide a written declaration stating that the thesis – or in the case of group work, the appropriately marked part of the thesis – was completed independently and that no sources and aids other than those indicated were used. If parts of the examinations were created using AI-based tools, the AI tools and programmes (including the prompts) used must be indicated.

- (2) The Bachelor's or Master's final examination is generally assessed by two examiners. One of the examiners is the supervisor of the Bachelor's or Master's thesis. The evaluation process should not exceed four weeks. A written justification of the grading must be provided. If the assessments of the first and second examiners differ by 1.5 or more grade points, the Examination Committee must be informed, and a decision must be made on the appointment of a third reviewer. For Bachelor's study programmes without an oral final examination, the responsible Examination Committee may decide that only one examiner evaluates the thesis.
- (3) If the Bachelor's or Master's final examination is graded below "sufficient" (4.0), it can be repeated up to two times; a third repetition is not permitted. A new topic must be approved within three months of the notification of failure, as per § 25 (2) sentence 2. If the application deadline is missed, the right to review expires, unless the failure is not the responsibility of the examinee.

§ 27 Calculation of the Final Grade and Certificate

- (1) In accordance with § 10 (5), the final grade is calculated from the grades of the module examinations and the grade of the Bachelor's or Master's final examination.
- (2) In the case of outstanding performance (a final grade of at least 1.2), the overall assessment "passed with distinction" is awarded.
- (3) A certificate of the successfully completed Bachelor's or Master's examination will be issued immediately, if possible, within four weeks. The module grades, the topic of the final thesis and its grade as well as the overall grade must be included in the certificate; the grades are shown in parentheses using decimal values in accordance with § 10 (4). If necessary, the certificate also includes the field of study, the main areas of study and the time taken to complete the Bachelor's or Master's examination.

(3a) The certificate of additionally attended modules and examinations completed, including the ECTS credits acquired in this way, shall be issued separately from the degree certificate by means of a certificate issued by the university.

(4) The certificate bears the date of the day on which the last examination was completed.

§ 28 Bachelor's/Master's degree, Bachelor's/Master's certificate and Diploma Supplement

(1) Upon successful completion of the Bachelor's or Master's degree, SRH University of Applied Sciences Heidelberg awards the Bachelor's or Master's degree approved by the responsible ministry and recognised by the state in the course of the accreditation of the study programme.

(2) Along with the certificate, the Bachelor's or Master's certificate is issued with the date of the certificate. This certifies the awarding of the Bachelor's or Master's degree. The certificate is signed by the Rector and bears the seal of the SRH University of Applied Sciences Heidelberg.

(3) In order to promote the international comparability of the Bachelor's or Master's degree and its qualification, an English-language Diploma Supplement is issued. This is provided in the version applicable to the respective year of study and is issued upon graduation (sample supplement to Appendix 1).

§ 29 Invalidity of the Bachelor's or Master's Examination

(1) If the candidate is found to have engaged in deception during an examination, and this is discovered only after the module grade has been announced or after the certificate has been issued, the grade of the examination may be corrected in accordance with § 11 (3). In this case, the module examination can be declared "insufficient" (5.0), and the Bachelor's or Master's examination can be declared failed. The same applies to the Bachelor's or Master's final examination itself.

(2) If the requirements for taking a module examination were not fulfilled without any intent to deceive on the part of the candidate, and if this is only discovered after the certificate has been handed over, this deficiency will be remedied by passing the module examination. However, if the module examination was wrongfully obtained, the module examination can

be declared "insufficient" (5.0) and the Bachelor's or Master's examination can be declared failed.

- (3) Before a decision is made, the persons concerned must be given the opportunity to provide a statement.
- (4) The incorrect certificate must be revoked and, if necessary, a new certificate shall be issued. Along with the incorrect certificate, the Bachelor's or Master's Diploma is also withdrawn if the Bachelor's or Master's examination was declared failed because of deception.
- (5) The decisions under this provision shall be made by the University Examination Committee.

§ 30 Transitional Provisions for Ongoing Examination Law Procedures

- (1) All ongoing examination procedures at the SRH universities, which were independent institutions until 30 September 2024 and merged into the SRH University of Applied Sciences Heidelberg in the winter semester 2024/25, will be completed on the basis of the current statutes of SRH University of Applied Sciences Heidelberg, in particular these General Examination Regulations. In doing so, the previous procedural steps and decisions must be taken into account.
- (2) In accordance with § 33 (2), procedural changes should only be made if they do not have any adverse effects on the students concerned compared to the previous regulations. The students concerned must be informed about the new legal framework and the resulting changes in their examination law procedures.

C. Definitions

§ 31 Abbreviations of the Forms of Examination for Coursework and Examinations

(1) The following abbreviations shall be used for the forms of examination in accordance with Appendix 3:

Forms of examination, written

(2) (Mandatory) Coursework and examinations are carried out using the forms of examination specified in § 7a (1) and **Appendix 3**.

(3) Abbreviations of time units in the tables:

Wo. -Weeks
Min. -Minutes
Sem. -Semester

§ 32 Determination of Credit Points and their Documentation

(1) In the module tables in **Appendix 1**, credit points (CP) are assigned to all modules. These correspond to the European Credit Transfer System (ECTS). One credit point generally corresponds to a workload of at least 25 hours.

(2) Courses that comprise a self-contained subject matter are referred to as modules. A module can be made up of several individual courses. Unless otherwise specified in **Appendix 1**, all courses of the Bachelor's or Master's programmes are modules.

(3) At the request of the student, the achievements (completed modules, credit points and grades) will be documented and issued in a Transcript of Records in English after graduation.

D. Final Provisions

§ 33 Entry into Force and Transitional Provisions

- (1) These General Examination Regulations come into force after the resolution has been passed by the Academic Senate and signed by the Rector with the university-wide announcement for the winter semester 2024/25 and applies to all students who start studying at SRH University of Applied Sciences Heidelberg in the winter semester 2024/25 or thereafter.
- (2) Students who have already started their studies in a Bachelor's or Master's programme based on the CORE principle at an SRH University at the time of the entry into force of these Examination Regulations shall complete their remaining examinations according to the rules in **Appendix 1** (programme-specific regulations) within the framework of this General Examination Regulations, provided that this does not result in any significant disadvantages for them. If significant disadvantages are found in application of these regulations, the University Examination Committee shall decide on the necessary measures for remedial action within the meaning of § 15b (2). § 30 applies accordingly.
- (2a) Unless there are any deviating regulations or legal requirements, the existing subject-specific examination regulations of the discontinued (non-harmonised) study programmes of the former SRH universities (from 01/10/24, these are locations of the Schools of the SRH University of Applied Sciences Heidelberg) continue to apply unchanged, except for provisions relating to Examination Committees and all procedural regulations. Where programme-specific regulations (**Appendix 1**) refer to provisions of the most recently applicable General Framework Regulations, these provisions referred to can be used to fill gaps that arise in application of these General Examination Regulations. This applies in particular to the assessment procedures in the non-harmonised and in the discontinued study programmes.
- (2b) Insofar as previously used forms of examination in accordance with the former examination regulations are to be applied in the discontinued (non-harmonised) study programmes as described in **Appendix 1** (subject- or course-specific regulations, module tables) which do not correspond to the forms of examination in **Appendix 3**, this is permissible at least for the

remaining duration of the applicable standard period of study. Paragraph (3) applies accordingly.

- (3) The entitlement to be examined in accordance with the applicable version of **Appendices 1** ends 12 months after the end of the standard period of study. This applies correspondingly to discontinued study programmes pursuant to para. 2a.
- (4) These Regulations shall enter into force after the decision of the Academic Senate in accordance with paragraph (1). For further adjustments, the Academic Senate within the meaning of § 15b of these regulations instructs the University Examination Committee (UEC) with the future preparation of these regulations. After the consent of the Rector in accordance with § 32 (3) LHG, these regulations must be published on the website and the learning platform of the SRH University of Applied Sciences Heidelberg, the date of the publication will be attached to the document.

Heidelberg, 31/10/2024

Credits in total	180	30	30	30	30	30	30			

(1) Special admission requirements

1. Information on entrance examinations, extent of pre-internship or professional experience, first degree, etc.
2. Other evidence, if applicable, e.g. health suitability, language certificates, NC information, special professional achievements, etc.

(2) General conditions of the course

1. Total number of credit points (CP) to be achieved. Workload per CP (25-30 hours).
2. Type of course (e.g. on-campus course). Special attendance regulations (particularly affects practical sections or seminars, etc.) Special admission conditions for taking the examinations.

(3) Special features of the course content

1. Scope and regulations of the practical study sections and, if applicable, the name of the corresponding modules.
2. Information on elective subjects and, if applicable, special regulations
3. Additional subjects, optional tracks - possibility of completing examinations in addition to the required achievements (e.g. via certificates).

(4) Final thesis and special regulations at the end of the course

1. Explanations of the Bachelor thesis module. Extent of the processing time and the colloquium. Proportional weighting of the partial achievements in the module.
2. Special information, e.g. on the state examination

DIPLOMA SUPPLEMENT

This Diploma Supplement model was developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value judgements, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

1. HOLDER OF THE QUALIFICATION

1.1. Family name

x

1.2. First name

x

1.3. Date of birth

xx.xx.xxxx

1.4. Student identification number

0

2. QUALIFICATION

2.1. Name of qualification (in original language)

Betriebswirtschaft

Title conferred

Bachelor of Arts (B.A.)

2.2. Main field(s) of study

Economic and Business, Business Environment, Communication

2.3. Name and status of awarding institution

SRH University of Applied Sciences Heidelberg, state-recognized

2.4. Name and status of institution administering studies

[same]

2.5. Language(s) of instruction/examination

German

3. LEVEL AND DURATION OF THE QUALIFICATION

3.1. Level of the qualification

First level degree (undergraduate) including thesis

3.2. Official duration of programme in credits and/or years

A minimum of 36 months

3.3. Access requirements

- Completion of upper secondary school
- School-leaving examination/higher education entrance qualification

4. CONTENTS AND RESULTS OBTAINED

4.1. Mode of study

Full-Time

4.2. Programme learning outcomes

The Bachelor's degree program in Business Administration (B.A.) at SRH University Heidelberg is designed as a practice-oriented, internationally focused full-time study program. Students learn to apply the theoretical knowledge gained, via practical application and acquire a global perspective; these being fostered through internships and also the opportunity to study abroad. The program integrates comprehensive business administration foundations as well as the development of competencies in areas such as marketing, finance, corporate management, and human resources. The option to choose specialization modules allows each student to set an individual focus to their study-program, whereby they deepen their knowledge in specific areas. The main goals of this program are to develop practice-oriented, future-oriented skills and to prepare students for successful professional careers in dynamic economic environments.

Education according to the CORE principle

The Business Administration program follows the CORE principle (Competence Oriented Research and Education), which encompasses the development of the following competencies:

- **Professional Competence:** Graduates possess well-founded business administration knowledge and are capable of analyzing and solving business-related problems.
- **Social Competence:** They can work in teams, communicate effectively, and resolve conflicts.
- **Methodological Competence:** They master quantitative and qualitative research methods and can apply these to make informed decisions.
- **Self-competence:** They are able to work and organize themselves independently.
- **Practical Competence:** They can plan, execute, and successfully complete projects.

Professional Qualification

The program qualifies students for a variety of professions in different business areas, including marketing, finance, consulting, human resources, and logistics. Graduates are capable of handling key business administration topics and succeeding in a wide variety of professional fields. This bachelor degree prepares graduates to enter careers such as Marketing Manager, Financial Analyst, Business Consultant, or Human Resources Specialist.

Special Competencies

Graduates of the program can, for example:

- Analyze consumer behavior trends and apply them to specific markets.
- Develop and implement corporate strategies.
- Conduct financial analyses and make investment decisions.
- Plan and implement HR strategies.
- Interpret complex business data and derive well-founded decisions.

Application of Acquired Knowledge

Graduates of the Business Administration B.A. program offer employers the following professional competencies:

- Ability to develop well-founded business solutions for entrepreneurial challenges.
- Expertise in planning and executing marketing campaigns and financial analyses.
- Competence in leading projects and teams to efficiently achieve corporate goals.
- Skill in dealing with international business partners and adapting to global market conditions.

Through these comprehensive and practice-oriented learning objectives, graduates of the Business Administration program at SRH University Heidelberg are optimally prepared for the demands of the job market and are able to make valuable contributions in various professional contexts.

4.3. Programme details, individual credits gained and grades/marks obtained

See "Studien- und Prüfungsordnung" and "Prüfungszeugnis" (Final Examination Certificate) for subjects offered in final examinations (written and oral), and topic of thesis, including evaluations

4.4. Grading system, grade distribution table

German grades excellent (1.0-1.2), very good (1.3-1.5), good (1.6-2.5), satisfactory (2.6-3.5), sufficient (3.6-4.0), fail (>4.0)

Grade distribution table is issued separately

4.5. Overall classification (in original language)

x

5. FUNCTION OF THE QUALIFICATION

5.1. Access to further study

Qualifies to apply for admission to Master study programs

5.2. Access to a regulated profession

The Bachelor's degree confers on its holders the legally protected title Bachelor of Arts in Business Administration

6. ADDITIONAL INFORMATION

6.1. Additional information

„Urkunde Bachelor“

8. NATIONAL HIGHER EDUCATION SYSTEM

The information on the national higher education system on the following pages provides a context for the qualification and the type of higher education institution that awarded it.

8. INFORMATION ON THE GERMAN HIGHER EDUCATION SYSTEM¹

8.1 Types of Institutions and Institutional Status

Higher education (HE) studies in Germany are offered at three types of Higher Education Institutions (HEI)².

- *Universitäten* (Universities) including various specialised institutions, offer the whole range of academic disciplines. In the German tradition, universities focus in particular on basic research so that advanced stages of study have mainly theoretical orientation and research-oriented components.

- *Fachhochschulen* (FH)/Hochschulen für Angewandte Wissenschaften (HAW) (Universities of Applied Sciences, UAS) concentrate their study programmes in engineering and other technical disciplines, business-related studies, social work, and design areas. The common mission of applied research and development implies an application-oriented focus of studies, which includes integrated and supervised work assignments in industry, enterprises or other relevant institutions.

- *Kunst- und Musikhochschulen* (Universities of Art/Music) offer studies for artistic careers in fine arts, performing arts and music; in such fields as directing, production, writing in theatre, film, and other media; and in a variety of design areas, architecture, media and communication.

Higher Education Institutions are either state or state-recognised institutions. In their operations, including the organisation of studies and the designation and award of degrees, they are both subject to higher education legislation.

8.2 Types of Programmes and Degrees Awarded

Studies in all three types of institutions have traditionally been offered in integrated "long" (one-tier) programmes leading to *Diplom*- or *Magister Artium* degrees or completed by a *Staatsprüfung* (State Examination).

Within the framework of the Bologna-Process one-tier study programmes are successively being replaced by a two-tier study system. Since 1998, two-tier degrees (Bachelor's and Master's) have been introduced in almost all study programmes. This change is designed to enlarge variety and flexibility to students in planning and pursuing educational objectives; it also enhances international compatibility of studies.

The German Qualifications Framework for Higher Education Qualifications (HQR)³ describes the qualification levels as well as the resulting qualifications and competences of the graduates. The three levels of the HQR correspond to the levels 6, 7 and 8 of the German Qualifications Framework for Lifelong Learning⁴ and the European Qualifications Framework for Lifelong Learning⁵.

For details cf. Sec. 8.4.1, 8.4.2, and 8.4.3 respectively. Table 1 provides a synoptic summary.

8.3 Approval/Accreditation of Programmes and Degrees

To ensure quality and comparability of qualifications, the organisation of studies and general degree requirements have to conform to principles and regulations established by the Standing Conference of the Ministers of Education and Cultural Affairs of the *Länder* in the Federal Republic of Germany (KMK)⁶. In 1999, a system of accreditation for Bachelor's and Master's programmes has become operational. All new programmes have to be accredited under this scheme; after a successful accreditation they receive the seal of the Accreditation Council⁷.

8.4 Organisation and Structure of Studies

The following programmes apply to all three types of institutions. Bachelor's and Master's study programmes may be studied consecutively, at various higher education institutions, at different types of higher education institutions and with phases of professional work between the first and the second qualification. The organisation of the study programmes makes use of modular components and of the European Credit Transfer and Accumulation System (ECTS) with 30 credits corresponding to one semester.

8.4.1 Bachelor

Bachelor's degree programmes lay the academic foundations, provide methodological competences and include skills related to the professional field. The Bachelor's degree is awarded after 3 to 4 years.

The Bachelor's degree programme includes a thesis requirement. Study programmes leading to the Bachelor's degree must be accredited according to the Interstate study accreditation treaty.⁸

First degree programmes (Bachelor) lead to Bachelor of Arts (B.A.), Bachelor of Science (B.Sc.), Bachelor of Engineering (B.Eng.), Bachelor of Laws (LL.B.), Bachelor of Fine Arts (B.F.A.), Bachelor of Music (B.Mus.) or Bachelor of Education (B.Ed.).

The Bachelor's degree corresponds to level 6 of the German Qualifications Framework/ European Qualifications Framework.

8.4.2 Master

Master is the second degree after another 1 to 2 years. Master's programmes may be differentiated by the profile types "practice-oriented" and "research-oriented". Higher Education Institutions define the profile.

The Master's degree corresponds to level 7 of the German Qualifications Framework/European Qualifications Framework.

8.4.3 Integrated "Long" Programmes (One-Tier): *Diplom* degrees, *Magister Artium*, *Staatsprüfung*

An integrated study programme is either mono-disciplinary (*Diplom* degrees, most programmes completed by a *Staatsprüfung*) or comprises a combination of either two major or one major and two minor fields (*Magister Artium*). The first stage (1.5 to 2 years) focuses on broad orientations and foundations of the field(s) of study. An Intermediate Examination (*Diplom-Vorprüfung* for *Diplom* degrees; *Zwischenprüfung* or credit requirements for the *Magister Artium*) is prerequisite to enter the second stage of advanced studies and specialisations. Degree requirements include submission of a thesis (up to 6 months duration) and comprehensive final written and oral examinations. Similar regulations apply to studies leading to a *Staatsprüfung*. The level of qualification is equivalent to the Master's level.

- Integrated studies at *Universitäten* (U) last 4 to 5 years (*Diplom* degree, *Magister Artium*) or 3 to 6.5 years (*Staatsprüfung*). The *Diplom* degree is awarded in engineering disciplines, the natural sciences as well as economics and business. In the humanities, the corresponding degree is usually the *Magister Artium* (M.A.). In the social sciences, the practice varies as a matter of institutional traditions. Studies preparing for the legal, medical and pharmaceutical professions are completed by a *Staatsprüfung*. This applies also to studies preparing for teaching professions of some *Länder*.

The three qualifications (*Diplom*, *Magister Artium* and *Staatsprüfung*) are academically equivalent and correspond to level 7 of the German Qualifications Framework/ European Qualifications Framework.

. They qualify to apply for admission to doctoral studies. Further prerequisites for admission may be defined by the Higher Education Institution, cf. Sec. 8.5.

- Integrated studies at *Fachhochschulen* (FH)/ *Hochschulen für Angewandte Wissenschaften* (HAW) (Universities of Applied Sciences, UAS) last 4 years and lead to a *Diplom* (FH) degree which corresponds to level 6 of the German Qualifications Framework/European Qualifications Framework.

Qualified graduates of FH/HAW/UAS may apply for admission to doctoral studies at doctorate-granting institutions, cf. Sec. 8.5.

- Studies at *Kunst- und Musikhochschulen* (Universities of Art/Music etc.) are more diverse in their organisation, depending on the field and individual objectives. In addition to *Diplom*/*Magister* degrees, the integrated study programme awards include certificates and certified examinations for specialised areas and professional purposes.

8.5 Doctorate

Universities as well as specialised institutions of university standing, some of the FH/HAW/UAS and some Universities of Art/Music are doctorate-granting institutions. Formal prerequisite for admission to doctoral work is a qualified Master's degree (UAS and U), a *Magister* degree, a *Diplom*, a *Staatsprüfung*, or a foreign equivalent. Comparable degrees from universities of art and music can in exceptional cases (study programmes such as music theory, musicology, pedagogy of arts and music, media studies) also formally qualify for doctoral work. Particularly qualified holders of a Bachelor's degree or a *Diplom* (FH) degree may also be admitted to doctoral studies without acquisition of a further degree by means of a procedure to determine their aptitude. The universities respectively the doctorate-granting institutions regulate entry to a doctorate as well as the structure of the procedure to determine aptitude. Admission further requires the acceptance of the Dissertation research project by a professor as a supervisor.

The doctoral degree corresponds to level 8 of the German Qualifications Framework/ European Qualifications Framework.

8.6 Grading Scheme

The grading scheme in Germany usually comprises five levels (with numerical equivalents; intermediate grades may be given): "Sehr Gut" (1) = Very Good; "Gut" (2) = Good; "Befriedigend" (3) = Satisfactory; "Ausreichend" (4) = Sufficient; "Nicht ausreichend" (5) = Non-Sufficient/Fail. The minimum passing grade is "Ausreichend" (4). Verbal designations of grades may vary in some cases and for doctoral degrees.

In addition, grade distribution tables as described in the ECTS Users' Guide are used to indicate the relative distribution of grades within a reference group.

8.7 Access to Higher Education

The General Higher Education Entrance Qualification (*Allgemeine Hochschulreife*, *Abitur*) after 12 to 13 years of schooling allows for admission to all higher educational studies. Specialised variants (*Fachgebundene Hochschulreife*) allow for admission at Fachhochschulen (FH)/Hochschulen für Angewandte Wissenschaften (HAW) (UAS), universities and equivalent higher education institutions, but only in particular disciplines. Access to study programmes at Fachhochschulen (FH)/Hochschulen für Angewandte Wissenschaften (HAW) (UAS) is also possible with a Fachhochschulreife, which can usually be acquired after 12 years of schooling. Admission to study programmes at Universities of

The Master's degree programme includes a thesis requirement. Study programmes leading to the Master's degree must be accredited according to the Interstate study accreditation treaty.⁹

Second degree programmes (Master) lead to Master of Arts (M.A.), Master of Science (M.Sc.), Master of Engineering (M.Eng.), Master of Laws (LL.M.), Master of Fine Arts (M.F.A.), Master of Music (M.Mus.) or Master of Education (M.Ed.). Master's programmes which are designed for continuing education may carry other designations (e.g. MBA).

provided they have obtained advanced further training certificates in particular state-regulated vocational fields (e.g. *Meister/Meisterin im Handwerk, Industriemeister/in, Fachwirt/in (IHK), Betriebswirt/in (IHK) und (HWK), staatlich geprüfte/r Techniker/in, staatlich geprüfte/r Betriebswirt/in, staatlich geprüfte/r Gestalter/in, staatlich geprüfte/r Erzieher/in*). Vocationally qualified applicants can obtain a *Fachgebundene Hochschulreife* after completing a state-regulated vocational education of at least two years' duration plus professional practice of normally at least three years' duration, after having successfully passed an aptitude test at a higher education institution or other state institution; the aptitude test may be replaced by successfully completed trial studies of at least one year's duration¹⁰.

Higher Education Institutions may in certain cases apply additional admission procedures.

8.8 National Sources of Information

- Kultusministerkonferenz (KMK) [Standing Conference of the Ministers of Education and Cultural Affairs of the Länder in the Federal Republic of Germany]; Graurheindorfer Str. 157, D-53117 Bonn; Phone: +49(0)228/501-0; www.kmk.org; E-Mail: hochschulen@kmk.org
- Central Office for Foreign Education (ZAB) as German NARIC; www.kmk.org; E-Mail: zab@kmk.org
- German information office of the Länder in the EURYDICE Network, providing the national dossier on the education system; www.kmk.org; E-Mail: Eurydice@kmk.org
- Hochschulrektorenkonferenz (HRK) [German Rectors' Conference]; Leipziger Platz 11, D-10117 Berlin, Phone: +49 30 206292-11; www.hrk.de; E-Mail: post@hrk.de
- "Higher Education Compass" of the German Rectors' Conference features comprehensive information on institutions, programmes of study, etc. (www.higher-education-compass.de)

Art/Music and comparable study programmes at other higher education institutions as well as admission to a study programme in sports may be based on other or additional evidence demonstrating individual aptitude.

Applicants with a qualification in vocational education and training but without a school-based higher education entrance qualification are entitled to a general higher education entrance qualification and thus to access to all study programmes,

¹ The information covers only aspects directly relevant to purposes of the Diploma Supplement.

² Berufsakademien are not considered as Higher Education Institutions, they only exist in some of the Länder. They offer educational programmes in close cooperation with private companies. Students receive a formal degree and carry out an apprenticeship at the company. Some Berufsakademien offer Bachelor courses which are recognised as an academic degree if they are accredited by the Accreditation Council.

Appendix 2 to the General Examination Regulations (GER)

I. Procedure for students who need to make up for module contents.

- (1) Students have the possibility to make up for module contents that they have missed partially or completely (e.g. due to illness), using the teaching and learning material available for the module. These teaching and learning materials associated to the course (course material, home assignments, exercises including hints for the solution, list of specialised literature etc.) are located on a central server, allowing students access to them.
- (2) Students must also arrange two appointments with their lecturer. The first meeting is to inform the students about the teaching and learning material available for the module contents that they have missed. This ensures that the students can concentrate on those teaching and learning contents that they need to make up for. In the second meeting, the lecturer checks on the progress of the students. The students must then sit for the examination to complete the module.

II. Availability of the information for students who have missed module contents.

- (1) The students are informed about how to make up for module contents they have missed (e.g. due to illness) during the introductory class as well as in the study guide. It is the students' responsibility to arrange further one-on-one meetings with the relevant lecturers beyond the two obligatory appointments discussed in Sec. I (2).
- (2) The Examination Office for the Schools at SRH University announce an examination schedule for the regular examinations, i.e. those that need to be completed within the (5-week) module, at the start of each semester. At the same time, they also release the schedule for make-up exams for those students who will not complete the examinations on the regular dates, for whatever reason, e.g. illness, failing, unexcused absence. This creates transparency right at the start of the semester about when the examinations and the make-up examinations will take place, allowing the students to concentrate on preparing for their exams.
- (3) To prepare for the exams, the students can access the course-accompanying materials (course materials, home assignments, exercises with hints for the solutions, lists of specialised literature etc.). This ensures that a temporary absence (e.g. due to illness) does not necessarily entail an interruption of the students' studies or an extension of the duration of their studies beyond the regular duration.

Appendix 3 to the General Examination Regulations (GER) version 30/10/2024

Definition of the examination forms referred to in § 7a/b of these regulations

General remarks:

Together with the learning objectives or learning outcomes and the corresponding forms of teaching and delivery of the modules, the form and content of the examination form what is known as constructive alignment. Accordingly, all of the following forms of examination serve to determine the extent to which students have acquired the **competences** to be achieved in the module to be examined. The following definitions contain the general specifications regarding the type and procedure of the examination to be taken. Insofar as the definitions contain framework specifications regarding the duration and/or scope of an examination, deviating regulations in the sense of constructive alignment can be made in **Annex 1** (examination regulations of the degree programmes), which in this respect take precedence over this annex. The competences listed under 'Examination objective' are to be understood as an indication of the possible testable competences.

Predominantly written examinations

Examination form (german-abbr.):	Written Examination (Kls)
Examination objectives (skills):	To test students' knowledge of material and methodology (material and methodology skills)
Definition and procedure:	A written examination is completed under supervision. It should test whether students can, within a set time and with limited resources, reproduce the acquired knowledge and recognize and solve a problem using common methods.
Duration/scope:	60-120 mn.
Number of examiners:	At least 1

Examination form (german-abbr.):	Student Research Project (StA)
Examination objectives (skills):	To test students' ability to independently write an analytical academic text (material, methodology and personal skills)
Definition and procedure:	A Student Research Project is a written academic paper incorporating and analyzing relevant literature. Students are usually given four weeks to write it. Student research projects test whether students can grasp problems within their larger context and devise approaches to solve them and may also require defending their results in front of an audience.
Duration/scope:	4 weeks/15-20 pages
Number of examiners:	At least 1

Examination form (german-abbr.):	Research and Documentation (ReD)
Examination objectives (skills):	To test students' grasp of the fundamentals of academic work (material and methodology skills)
Definition and procedure:	Research and documentation are essential skills in academic work. Research refers to the systematic search, acquisition and selection of information on a specific subject. Documentation refers to the ordering, archiving and managing of this information. Both are necessary steps for solving an academic problem. The techniques and methods involved in research and documentation are taught at the start of the students' studies through practical exercises.
Duration/scope:	4 weeks
Number of examiners:	At least 1

Examination form (german-abbr.):	Essay (Es)
Examination objectives (skills):	To test students' aptitude to independently write a critical academic text (material, methodology and personal skills)
Definition and procedure:	The essay (French: <i>essai</i> ; German <i>Versuch</i>) is a short, demanding, consciously subjective text on a specific topic in a scientific, political, philosophical or similar field. The essay is an appropriate form for topics that are thought-provoking and allow space for personal ideas. The starting point may be a specific problem, thesis or controversial issue. Essays are an avenue for students to express original thoughts. Essays differ from final papers by generally being shorter and mainly reflecting the students' own ideas and assessments.
Duration/scope:	4 weeks/5-10 pages
Number of examiners:	At least 1

Examination form (german-abbr.):	Exposé (Ex)
Examination objectives (skills):	To test students' ability to design a plan for writing an academic paper (material and methodological skills)
Definition and procedure:	A written exposé entails the presentation of a research question for an academic paper. It is a brief description of the aim of the project, presenting the research question, the theoretical background, the methodology, the structure, relevant literature and a schedule. The exposé should inform the examiner of the envisaged design of the paper, allowing him to determine whether the undertaking, in its presented form, is realistic or in need of modifications.
Duration/scope:	Depends on the scope of the academic paper; max. 15 pages
Number of examiners:	At least 1

Examination form (german-abbr.):	Learning Diary (LT)
---	----------------------------

Examination objectives (skills):	Critical reflection and organization of learning experiences (material and personal skills)
Definition and procedure:	The learning diary is an ongoing logbook of the student's own learning process. The student writes down the major points of the learning material in his own words. Note that this is a separate activity from note-taking during lectures. The learning diary is a proven instrument for students to document their own learning practices, systematically reflect upon them and change them if necessary. It also serves to make the learning process more binding and sustainable.
Duration/scope:	Duration of a module; usually 4 weeks
Number of examiners:	At least 1

Examination form (german-abbr.):	Internship Report (PB)
Examination objectives (skills):	Reflective analysis of the internship (material, methodological and personal skills)
Definition and procedure:	The practical report is a written report on the internship. Its aim is to allow students to document and reflect upon their personal learning process and skill acquisition during the internship. In addition, they should present examples of how the material and methodology skills they acquired over the course of their studies were applied in the field.
Duration/scope:	Duration of the internship; 10-20 pages
Number of examiners:	At least 1

Examination form (german-abbr.):	Portfolio (PF)
Examination objectives (skills):	Monitoring and documenting the learning progress that students make in terms of both knowledge and skills in the course (professional, methodological and personal competence)
Definition and procedure:	A portfolio contains a collection of selected work that summarises the student's own document one's own achievements, learning progress and level of performance at a specific at a certain point in time and in relation to a specific area. The selection and meaningfulness of the work as well as the reference to one's own progress must be addressed and justified by the person being examined. and justified.
Duration/scope:	Please observe §9a para. 2 sentence 2!
Number of examiners:	1

Examination form (german-abbr.):	Protocol (Pro)
Examination objectives (skills):	To test students' ability to condense and summarize a topic (material, methodological and personal skills)
Definition and procedure:	A protocol shows the student's ability to grasp and provide a condensed account of a sequence of events in written form.
Duration/scope:	Depends on subject and situation
Number of examiners:	At least 1

Examination form (german-abbr.):	Test (Te)
Examination objectives (skills):	To test students' learning progress and ability to reproduce the acquired knowledge (material skills)
Definition and procedure:	A test is generally a brief written paper to test learning progress. Questions on topics that have already been covered must be answered concisely. The test serves as a self-monitoring instrument for students and is an easy method for the lecturer to measure the progress of their knowledge over the course.
Duration/scope:	10-30 mn.
Number of examiners:	At least 1

Examination form (german-abbr.):	Thesis (Th)
Examination objectives (skills):	To test students' ability to present the acquired material and methodology skills and their grasp of the subject on a selected topic at the completion of their studies (material methodology and personal skills)
Definition and procedure:	Bachelor's and master's theses are academic final papers, written under the supervision of an advisor at the end of the students' studies. A thesis should show that the student knows how to apply what he has learned and can independently investigate a topic of his own choosing in an appropriate amount of time.
Duration/scope:	Depends on the subject – see Appendixes 2/2a; bachelor: 30-60 pages, master: 40-80 pages
Number of examiners:	At least 2 (first and second reviewer)

Examination form (german-abbr.):	Research report (Fob)
Examination objectives (skills):	Application of professional and methodological knowledge (professional and methodological competence) for a research question
Definition and procedure:	With a research report, students demonstrate that they have developed a limited question/hypothesis under supervision on a scientific basis within a reasonable scientific basis within a reasonable period of time.
Duration/scope:	In consultation with the module supervisor, the completion deadline and the scope of the the scope of the examination.
Number of examiners:	At least 1

Examination form (german-abbr.):	Project report (Prb)
Examination objectives (skills):	Application of tec professional hnical and methodological knowledge (professional and methodological competence) in a project
Definition and procedure:	With a project report, students demonstrate that they have completed a thematically project under supervision in a goal-orientated manner and on a scientific scientific basis within a reasonable period of time
Duration/scope:	In consultation with the module supervisor, the completion deadline and the scope of the the scope of the examination.
Number of examiners:	At least 1

Examination form (german-abbr.):	Open Book Exam (OBP)
Examination objectives (skills):	Examination of professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	The aim of open-book examinations is to determine whether the student is able to time, can present facts and problems of the subject with the usual methods and methods or develop ways to solve them. This can be done aids, such as course materials, their own notes or books, or even use online notes or books can be used or online research can be carried out. The sources used must be stated. The use of interim results from other examination participants is examination candidates is considered an unauthorised aid.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Visual Mapping (VMg)
Examination objectives (skills):	Examination of professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	Visual mapping refers to the creation of a visually structured overview of a complex issue in the system.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Toolbox (Tob)
Examination objectives (skills):	Examination of professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	The toolbox is a logical compilation of various methods, individually visualised to support and develop the work process as a 'toolbox'.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Scenario (Sze)
Examination objectives (skills):	Examination of professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	Scenario means the description of a living environment in a context determined by framework parameters (time/place/trends etc.).
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Publication (Pub)
Examination objectives (skills):	Examination of professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	Publication means the summarisation and preparation of project content for potential publication; it is tailored to a specific target group in terms of content and visuals.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Process report (Pzb)
Examination objectives (skills):	Examination of professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	A process report is the detailed documentation of the process flow of a project logically structured and visualised.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Manifesto (Man)
Examination objectives (skills):	Examination of professional and methodological knowledge (professional and methodological competence) as well as self-competence
Definition and procedure:	The manifesto is an individual creative format for expressing a context-related attitude, including the procedure for realising or achieving it.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Cumulative essay (KuE)
Examination objectives (skills):	Professional, methodological and self-related knowledge (professional, methodological and self-competence)
Definition and procedure:	The cumulative essay comprises a predetermined number of short essays, which are usually to be written in a certain time rhythm and of which all or a predetermined, appropriate number are included in the overall assessment of the module.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Infographics (Ing)
Examination objectives (skills):	Professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	Infographics refers to the visual representation of teaching content and its interrelationships.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Businessplan (Bpl)
Examination objectives (skills):	Professional and methodological knowledge (professional and methodological competence)
Definition and procedure:	A business plan is a formal written document that includes the company's objectives and, in particular, the methods of achieving these objectives and the timeframe within which they must be achieved. It also describes the nature of the business, background information on the company, the company's financial projections and the strategies it intends to implement to achieve the goals set. In its entirety, this document serves as a roadmap that sets the direction for the company. This can be done, for example, in the Business Model Canvas.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Exhibition (Ast)
Examination objectives (skills):	Professional, methodological knowledge (Professional and methodological expertise) and social skills competence
Definition and procedure:	An exhibition is the visual, interactive and self-explanatory presentation of the results of a project.
Duration/scope:	The examination period and scope vary depending on the subject of the examination. Please §9a para. 2 sentence 2!
Number of examiners:	At least 1

Predominantly oral examinations

Examination form (german-abbr.):	Oral Exam (MP)
Examination objectives (skills):	Ability to discuss the topic with the examiner (material and personal skills)
Definition and procedure:	An oral exam allows the candidate to show that he recognizes the interconnections within the subject field, can present factual arguments about them, and knows how to situate and discuss specific questions within these interconnections. The oral exam also aims to test whether the student has a broad knowledge of the fundamentals of the subject.
Duration/scope:	Usually 20 mn.; at least 10 and at most 30 mn.; see §8 para. 3 of the General Examination Regulations
Number of examiners:	At least 2 – please see §8!

Examination form (german-abbr.):	Report/Presentation (Ref)
Examination objectives (skills):	Ability to research and present a scientific topic; the focus lies on a clear, memorable presentation and on the ability to situate the topic within the broader subject field (material, methodology, social and personal skills)
Definition and procedure:	The presented paper consists of: 1. An independent, in-depth, possibly written discussion of a problem related to the course material, including a discussion of relevant literature. 2. The presentation of the work and its findings and a question-and-answer session. The Q&A may extend to other topics in the module. The presented paper can be either an individual or a group effort. If students work in a group, their respective roles must be clearly defined in the (written) preparation period.
Duration/scope:	Variable preparation time. Oral presentation time usually 20 mn., but at least 10 and at most 30 mn.; see §8 para. 3 of the General Examination Regulations
Number of examiners:	At least 1; 2 preferable → please refer to §8 for the oral presentation part of the exam!

Examination form (german-abbr.):	Presentation (Präs)
Examination objectives (skills):	Ability to give a clear and focused presentation of a complex topic and to situate it within a larger context (material, methodology, social and personal skills)
Definition and procedure:	A presentation allows students to showcase their ability to process a specific topic within a set timeframe in order to present it clearly and concisely to an audience and situate it in a larger context. It also tests their ability to respond to questions and input by the audience. The subject matter may include the entire module. Group presentations are possible, but the examiner should define the role of each student within the group beforehand. There is no written part (compare with the presented paper).

Duration/scope:	Variable preparation time. Oral part usually 20 mn., but at least 10 mn. and at most 30 mn.; see §8 para. 3 of the General Examination Regulations.
Number of examiners:	At least 2 – please refer to §8!

Examination form (german-abbr.):	Colloquium (Ko)
Examination objectives (skills):	Validation of the sum of the material and personal skills acquired over the course of the student's studies (material, methodology, personal and social skills)
Definition and procedure:	A colloquium is a type of oral exam taken in connection with a thesis or other form of examination. In it, the student explains his work and demonstrates that he has comprehensively examined the subject and can address research questions in the subject field at an academic level.
Duration/scope:	Usually 30 mn.; see §8 para. 3 of the General Examination Regulations!
Number of examiners:	At least 2

Predominantly practical examinations

Examination form (german-abbr.):	Project Work (PA)
Examination objectives (skills):	To test students' ability to develop a project in a team (material, methodology, social and personal skills)
Definition and procedure:	The project is generally a practice-oriented work that students must complete within a given timeframe, with a specific goal set by the examiner. The core of the project is the analysis and critical discussion of complex problems and their solution. Students are required to apply various information and methodologies. The topic may be self-selected or assigned by the examiner. As projects are generally group efforts, they also develop communication and cooperation skills. A successful project involves a well-founded academic analysis of the problem, the development of concrete implementation strategies, their execution, and an evaluation. This process is generally documented through a presentation on the project's development and implementation; a written discussion of the underlying data may also form part of the examination.
Duration/scope:	Duration and scope vary depending on the project and topic. Please refer to §9a para. 2 point 2!
Number of examiners:	At least 1; 2 preferable → please refer to §8 for the oral part of the examination!

Examination form (german-abbr.):	Roleplay (Ro)
Examination objectives (skills):	To test students' perception, cooperation, communication and problem-solving skills (material, methodology, social and personal skills)
Definition and procedure:	A roleplay's main aim is to test the student's competence. This occurs through reflective action, own experience, self-reflection and the feedback of observers. The comparison between self-reflection and the reflections of others opens up useful spaces for learning. Roleplays serve to present learned material, processes or methods in a playful manner but according to set rules. These rules must be followed in all phases of the game. Roleplays generally have 3 phases: the preparation phase, the game phase and the evaluation phase.
Duration/scope:	30-90 mn.; please refer to §9a para. 2 point 2!
Number of examiners:	At least 1; 2 preferable → please refer to §8 for the oral part of the examination!

Examination form (german-abbr.):	Case Study (FA)
Examination objectives (skills):	To test students' perception, cooperation, communication and problem-solving skills (material, methodology, social and personal skills)

Definition and procedure:	The starting point of a case study is a real-life situation that requires the development of a strategy to address the problem. The students take on the role of actors in that situation. They interpret the case, analyze connections, research additional information and, based on all these, develop possible solutions. These solutions are then discussed and possibly compared with the actual solutions that were devised or decisions that were taken in that situation. Case studies are primarily aimed at developing competence. Students must show that they can grasp complex situations, independently acquire information and make good decisions.
Duration/scope:	Please refer to §9a para. 2 point 2!
Number of examiners:	At least 1; 2 preferable → please refer to §8 for the oral part of the examination!

Examination form (german-abbr.):	Moderation (Mod)
Examination objectives (skills):	Ability to actively lead and accompany learning processes, and to lead controlled, condensed, dialog-promoting discussions (material, methodology, social and personal skills)
Definition and procedure:	Moderation can take place in the framework of group work or in a lecture. Students must show that they can design didactic learning arrangements for their fellow students using a variety of methods or accompany a group effort's processes and results and summarize its core findings.
Duration/scope:	Usually 30-45 mn.; up to 90 to 135 mn. for group moderation. Please refer to §9a para. 2 point 2!
Number of examiners:	At least 1 + 1 proctor → please refer to §8 (oral examination)!

Examination form (german-abbr.):	Station Test (SP)
Examination objectives (skills):	OSCE=Objective structured clinical examination / OSPE=Organized structured practical examination To test students' procedures and behavior when completing theoretical and practical tasks (material, methodology, social and personal skills)
Definition and procedure:	In an OSCE/OSPE examination, the candidates run through a course of testing stations. At these stations various competencies, both theoretical and especially practical (clinical), are put to the test. An OSCE/OSPE should consist of at least four stations. Testing time must be the same at all stations and should be determined prior to the examination. At each station, the task is read out to the students or is presented to them in writing. There is a trained examiner at each station who evaluates the students with the help of a checklist.
Duration/scope:	At least 4 stations; duration per station usually 5 to 8 mn.
Number of examiners:	= number of stations; please refer to §8 for the oral part of the examination!

Examination form (german-abbr.):	Scientific Poster Presentation (WP)
Examination objectives (skills):	To test students' ability to present the results of an scientific work graphically in a clear, condensed form (material, methodology, social and personal skills)
Definition and procedure:	A scientific poster presentation is a visual presentation to an informed audience in the form of a poster documenting a topic with text, images and graphs. This examination form consists of the actual poster and the presentation built around that poster. Generally the large-format poster should include, beside formal information (authors, title, university logo etc.), the core points of the work in a few sentences: starting point, objective or research question, methodology, findings. It should be clear and comprehensible to non-specialists. The main focus of the examination is therefore on whether the student can present the essence of his work briefly, precisely and comprehensibly and can reflect on the value of the work and its findings.
Duration/scope:	4 weeks; oral part usually 5-15 mn.
Number of examiners:	At least 1; see §8 for the oral part of the examination if applicable.

Examination form (german-abbr.):	Practical work (PrA)
Examination objectives (skills):	To test students' practical skills under realistic conditions (material, methodology, personal and social skills)
Definition and procedure:	Through practical work, the students showcase their ability to solve a concrete task or problem individually or in teams using real-life methods. The specific requirements, the concrete testing and evaluation criteria and the duration can vary depending on the subject and topic and are therefore set individually by each examiner.
Duration/scope:	Depends on subject; duration of examination varies depending on task and topic. See §9a para. 2.
Number of examiners:	At least 1; depends on the specific design of the examination

Examination form (german-abbr.):	Technical Problem-Solving (TPL)
Examination objectives (skills):	To test students' ability to solve technical problems independently, with the methods of the field, in realistic working conditions (material, methodology, personal and social skills)

Definition and procedure:	Technical problem-solving involves solving a technical task representing a realistic problem, such as could arise as part of a larger project in working life. It generally consists of an analysis of the problem, of the development of several solution options if required, and, in the main, of the development of an individual solution using field-specific methods, relevant literature and rules.
Duration/scope:	Technical problem-solving can include the written form, calculations, sketches and/or programming. It may also involve a final presentation of the results as well as teamwork. Depends on subject; duration of examination varies depending on task and topic. See § 9a para. 2.
Number of examiners:	At least 1; depends on the specific design of the examination
Examination form (german-abbr.):	Practical Test (TT)
Examination objectives (skills):	To test students' practical skills under realistic conditions (depending on focus: material, methodology, personal and social skills)
Definition and procedure:	Practical tests (here, in an IT and engineering context) are practical tasks that students must complete immediately during the examination. All the tools and aids that would typically be available under real conditions are allowed. The students show their ability to find appropriate solutions to smaller problems under set conditions and to justify their decisions. The evaluation focuses on the quality and appropriateness of the solution and on the arguments in the justification.
Duration/scope:	60-240 mn.
Number of examiners:	At least 1
Examination form (german-abbr.):	Design (ENT)
Examination objectives (skills):	To test students' practical skills under realistic conditions (depending on focus: material, methodology, personal and social skills)
Definition and procedure:	A design (in the context of architecture) is a suggestion for planning a space, developed independently and under consideration of given or self-assigned requirements. A design allows students to show that they are capable, individually or in a group, of taking an overall approach that includes e.g. urban planning, functional, constructional, technical and/or aesthetic aspects in their totality and with their interactions, and that they can bring these aspects together in an individual design statement. The design generally takes the form of sketches, models, animations and/or textual explanations.
Duration/scope:	Duration and scope of the examination depend on the topic. Please refer to §9a para. 2 point 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Music (Mu)
Examination objectives (skills):	To test students' practical abilities under realistic conditions (depending on focus: material, methodology, personal and social skills)
Definition and procedure:	The Music examination form involves fulfilling an artistic task on the respective instrument (required, required elective, individual instrument). Depending on the task, this can be a solo, duo or group effort. The presentation may also involve a textual representation (program, roadmap).
Duration/scope:	5-20 mn.
Number of examiners:	At least 1; 2 preferable
Examination form (german-abbr.):	Multimedia or Multimodal Presentation (MM)
Examination objectives (skills):	To test students' practical abilities under realistic conditions (depending on focus: material, methodology, personal and social skills)
Definition and procedure:	Preparation of contents for a multimedia or multimodal presentation that engages several senses, includes physical, sensual elements of perception (embodiment) and demonstrates a creative combination of various media, materials or artistic/aesthetic forms of design or expression. The multimedia or multimodal presentation can be an individual or a group effort.
Duration/scope:	15 - 60 mn.
Number of examiners:	At least 1; 2 preferably → please refer to §8 for the oral part of the examination!
Examination form (german-abbr.):	Praxis Situation (PS)
Examination objectives (skills):	To test students' practical abilities under realistic conditions (depending on focus: material, methodology, personal and social skills)
Definition and procedure:	In a praxis situation, students are presented with a real case. As in real-life situations, they are usually given no time to prepare. They must briefly introduce the client and then show that they have the knowledge and skills to ascertain theoretical causes (e.g. anatomy, pathology) in this case through questioning. Based on the case, students must show that they are capable of selecting an adapted client- and target-oriented diagnostic procedure and therapy/technique and of justifying their decisions. Students also demonstrate the execution of the chosen diagnostic procedures and therapies/techniques on a fellow student. Their social and personal skills, e.g. communication, directions and interaction with the "client" in a set timeframe, are also evaluated.
Duration/scope:	20-40 mn.

Number of examiners:	At least 1
----------------------	------------

Examination form (german-abbr.):	Laboratory (Lab)
Examination objectives (skills):	To test students' ability to apply theoretical knowledge to lab and/or mechanical processes and evaluate it (depending on focus: material, methodology, personal and social skills)
Definition and procedure:	A laboratory examination includes preparation, execution and documentation as well as an analysis of the results of lab tests or testing systems, based on a research question. Through the examination of a topic assigned by the lecturer, students demonstrate that they can apply existing knowledge and information correctly to the execution of lab work. This includes the technical measurement of relevant values and the written evaluation, interpretation and evaluation of the experiment's results.
Duration/scope:	Duration and scope of the examination depend on the topic. Please refer to §9a para. 2 point 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Performance test (Pef)
Examination objectives (skills):	Application of predominantly professional and methodological knowledge (professional and methodological competence) in the sense of action competence in an exemplary work situation
Definition and procedure:	In a performance examination, acquired knowledge and competences are to be applied to an exemplary situation. The performance examination comprises the execution of the task fulfilment and the reflection on preparation and execution. The duration of an individual examination should be a minimum of 15 and a maximum of 30 minutes.
Duration/scope:	Min. 15 / max. 30 min.
Number of examiners:	At least 1

Examination form (german-abbr.):	Problem Oriented Learning (POL)
Examination objectives (skills):	Application of professional, methodological and social knowledge (professional, methodological and social competence) to an exemplary learning content

Definition and procedure:	The student presents the contents of a module in a case-orientated, interdisciplinary and exemplary manner using the problem-oriented approach (Problem Oriented Learning) according to the seven-jump method and moderates a corresponding group session.
Duration/scope:	Group management: 3 students 30 minutes each, examination duration min. 90 minutes / max. 240 minutes, usually 180 minutes.
Number of examiners:	At least 1

Examination form (german-abbr.):	Teaching sample (Lhp)
Examination objectives (skills):	Application of professional, methodological, self-related and social knowledge (professional, methodological, personal and social skills) in a teaching/learning unit
Definition and procedure:	In the teaching test, students demonstrate that they can combine the specialist and management skills they have acquired and apply them independently in their new professional field of activity in order to demonstrate pedagogical competence in teaching activities with regard to the planning, implementation and evaluation of teaching units, including pedagogical and organisational activities.
Duration/scope:	The date and the teaching concept are prepared in consultation between students and the examiner at the university. Scope of examination: Teaching sample 90 minutes; reflection discussion min. 30 minutes; max. 60 minutes, usually 45 minutes
Number of examiners:	At least 1

Examination form (german-abbr.):	Workshop (WSP)
Examination objectives (skills):	Application of professional, methodological, self-related and social knowledge (professional, methodological, personal and social skills)
Definition and procedure:	The workshop examination form generally comprises the conception, planning, organisation, preparation and implementation (including moderation) of a workshop with a group of participants on a specific topic over a defined period of time with a set objective.
Duration/scope:	Examination period and scope vary depending on the subject of the examination. Please note §9a para. 2 sentence 2!
Number of examiners:	At least 1

Examination form (german-abbr.):	Prototype (Prt)
Examination objectives (skills):	Review of professional and methodological knowledge (professional and methodological expertise)
Definition and procedure:	The development of a prototype means making the results of an innovation process tangible and perceptible in the form of artefacts, e.g. product models, click dummies, service blueprints, etc. with the aim of communicating and testing them
Duration/scope:	Examination period and scope vary depending on the subject of the examination. Please note §9a para. 2 sentence 2!
Number of examiners:	At least 1

Appendix 4 to the General Examination Regulations (GER)

regarding the transfer of courses, coursework and examinations and the recognition of non-university qualifications (transfer regulations)

Due to § 70 (8) and § 35 (1) of the Higher Education Act (*Landeshochschulgesetz Baden-Württemberg*, LHG) in its version from 17/12/2020, last modified by Article 8 of the Act from Feb. 7, 2023 (GBl. p. 26, 43), and based on the decision of the Conference of Education Ministers from 10/10/2003 in its version from 04/02/2010 and in complement to § 14 of these GER, on Oct. 30, 2024 the Academic Senate of SRH University of Applied Sciences Heidelberg (hereinafter: SRH University) ruled on the following **Appendix 4 to the General Examination Regulations** regarding the transfer of courses, coursework and examinations and the recognition of non-university qualifications.

§ 1 Scope and purpose

- (1) This Appendix to the General Examination Regulations (hereinafter: Regulations) provides the framework for a uniform, transparent and efficient process for the transfer of credits, courses, coursework and examinations (hereinafter credits) and the recognition of qualifications at SRH University in accordance with the law of May 16, 2007 (*Bundesgesetzblatt Jahrgang 2007 Teil II Nr. 15*) based on the agreement of April 11, 1997, on the transfer of qualifications among universities in the European region (Lisbon Convention) and of § 35 of the LHG. It regulates the transfer of courses, coursework and examinations and the recognition of non-university qualifications at SRH University in all Master's and Bachelor's study programmes. The Regulations apply together with the programme-specific Appendix 1 for the study programme for which a credit transfer or recognition is sought.
- (2) The transfer of credits is based on the "substantial difference" criterion in §§ 2 and 3.
- (3) The recognition of non-university qualifications is based on the "equivalence" criterion in § 4.
- (4) The competence for transfer and recognition procedures of the respective institutions in accordance with § 5 of these Regulations remains unaffected.

§ 2 Transfer of credits

- (1) Credits received at public or state-accredited universities in Germany or abroad are generally accepted. A credit transfer can only be refused when the learning outcomes are shown to differ substantially in terms of contents, qualification level and profile from the equivalent coursework or examination at SRH University. It should be noted that credits whose requirements are significantly higher than those of their equivalents at SRH University do not represent a substantial difference in the sense of these Regulations. Modules that can be completed without ungraded examinations (coursework) or without graded examinations are also recognised; an indication of this recognition in the certificate is permitted.

- (2) The **criteria** for accepting a credit transfer in accordance with para. 1 are the **learning outcomes** or **learning objectives**, the **quality**, the **level**, the **workload** and the **profile** of the coursework or examination:

1. Learning outcomes or objectives

No substantial difference in learning outcomes or objectives is considered to exist when these do not differ substantially from their equivalents in terms of knowledge, competence, application of the knowledge, personal, social and methodology skills, and difficulty. This is not based on a direct comparison but on an overall review and evaluation of the impact of the outcomes or objectives on the goal of the course of study.

2. Quality

No substantial difference in quality is considered to exist when the credits were received in one of the following degree programmes:

- a. Accredited study programme at a university in Germany, or study programme at a university in Germany whose quality assurance system is accredited;
- b. Study programme at a university in a foreign country with which there is a cooperation agreement on the exchange of students in that study programme or in the same field;
- c. A study programme run jointly with a foreign university; see paragraph 3;
- d. A study programme or subject at a foreign university accredited by the Department for Foreign Education (*Zentralstelle für ausländisches Bildungswesen, ZAB*) of the German Federal Standing Committee of the Ministers of Education (*Kultusminister Konferenz, KMK*); in case of doubt, refer to the relevant office at SRH University;
- e. If a study programme at a university in Germany does not fall under the obligation of accreditation (in particular *Diplom, Magister* or *Staatsexamen* study programmes), other relevant criteria may be used to evaluate its quality.

3. Level

No substantial difference in level is considered to exist when the credits received in a study programme were received at a similar level of the graduate system (Bachelor's degree, Master's degree or other degree programme). Study programmes abroad should be categorised according to the equivalence class of the aimed-for degree based on the evaluation of the Department for Foreign Education (ZAB). Credits received in a degree programme that is categorised at another level may also be recognised if the learning outcomes in the sense of No. 3 are similar to those of their equivalent. The multiple use of the same credits in sequential degree programmes is not permitted; credits cannot be transferred for a Master's degree if they were completed in the course of a Bachelor's degree. This does not apply to credits received in addition to the Bachelor's degree on which the Master's degree programme is based.

4. Workload

No substantial difference in the workload is considered to exist when the workload has a similar scope or, should the scope be different, when the learning outcomes in the sense of No. 3 were achieved. The qualitative outcomes (learning outcomes in the sense of No. 3) carry a greater weight than the quantitative scope (workload) in the evaluation. If credit points are assigned in line with the European Credit Transfer System (ECTS) or another credit point system, the workload should be compared in terms of credit points; differences in credit point systems should be taken

into account. Recognition may also be granted when no credit points were assigned if the documentation as described in para. 6 indicates that the coursework or examinations were completed and the learning outcomes in the sense of No. 3 were sufficiently achieved. Please refer to para. 7 point 7.

5. Profile

No substantial difference in profile is considered to exist if in case of recognition the essential characteristics of the equivalent degree programme, determined by the examination regulations or the module handbooks, e.g. main focus or central qualification and skill objectives, have been satisfied. When comparing, the extent to which the course, coursework or examination enables the student to successfully continue their studies and complete their degree should be examined in light of the degree programme's profile rather than in a detailed examination.

- (3) For the recognition of credits completed abroad, the terms of university cooperation agreements should be taken into account.

§ 3 Application for the transfer of credits

- (1) For identical or similar study programmes, applicants or students must inform SRH University if they have completed credits that may fall within the scope of § 2 (1). A respective application must be made. In other cases, applicants or students may forgo the application for recognition.
- (2) The transfer process requires an application; please refer to para. 1. Applicants must provide the necessary documents in German or English to the competent authority (usually the School's Examinations Department); the competent authority may allow further languages. The final decision is made by the Examinations Committee following acceptance and registration at SRH University. To the extent that it is possible and necessary for assessing the remaining duration of studies, the competent authority may request a non-binding pre-assessment.
- (3) The documentation must provide the following information about the credits to be transferred:
1. Learning outcomes or learning objectives
 2. University
 3. Study programme
 4. Time period
 5. Evaluation, including failed coursework or examinations and the number of repeat attempts
 6. Workload

Should there be a Learning Agreement or other similar individual binding agreement, this must be presented. This also applies for a certificate of recognition delivered by SRH University for foreign documentation of previous education.

The credits must be documented with an original or a certified copy of the certificate from the university where they were received. Should there be no module handbook to evaluate the learning outcomes or learning objectives in the sense of No. 5 or the workload in the sense of No. 6, these should be substantiated through appropriate documentation with the required information.

- (4) When credits are recognised, and provided that the grading systems are comparable, the grades received are also transferred and included in the overall grade according to the rules of the relevant Examination Regulations. If ECTS grade conversion tables exist for the foreign university, these are used to convert the grades unless otherwise specified in the relevant Examination Regulations. In

the absence of an ECTS or similar grade conversion table, the grade is converted according to the modified Bavarian formula (**Appendix**). When this is not possible or there is no grade, the credit is marked "Pass." A re-evaluation of already transferred credits is not possible. Transferred credits are marked as such in the transcript of records. The recognised credits are assigned the credit points foreseen by the relevant Regulation.

- (5) If possible, a credit transfer should be for an entire module. If a credit transfer is accepted for just one course, recognition of partial module requirements or, in certain justified cases, of full module requirements, may be granted, conditional on the completion of any outstanding coursework or examinations. Applicants must be notified of any such conditions and deadlines in writing.
- (6) Students who plan to study abroad and want their time abroad to be recognised should discuss this in advance with the Chairperson of the Examinations Committee or a representative. The results of this discussion should be put in writing in the form of a Learning Agreement. Once documentation is provided that the coursework or examinations have been completed, they should be recognised.
- (7) The following is inadmissible:
 - a. Transfer of a single examination for which the Examination Regulations stipulate an obligation to sit it at SRH University
 - b. Transfer of an already completed credit for the sake of improving the grade
 - c. Multiple transfers of the same credit for the same study programme at SRH University.
- (8) If a transfer is denied, the applicant must be notified of the reasons in writing. A transfer may not be denied solely on the grounds that a course or examination has no exact formal equivalent (examination form and duration, name and ECTS) at SRH University. The respective Examinations Committee is responsible for justifying why an application does not meet the requirements. The notification of rejection must be accompanied by a notice on legal remedies.

§ 4 Recognition of non-university qualifications

- (1) Equivalent knowledge and qualifications acquired outside a university setting can generally only be credited for up to half of the total course of study. The following types of qualification are considered:
 1. Formal, in particular federal or state-issued vocational training and further education certificates based on the German Vocational Training Act, Trade and Crafts Code, Maritime Professions Code and vocational training institutions, and equivalent certificates;
 2. Non-formal, in particular non-federal or state-controlled vocational training and further education certificates delivered by professional or expert associations, companies or other institutions, as long as these maintain a quality assurance system and use similar methods for testing competence as their University equivalent;
 3. Informal skills, in particular those acquired through professional experience.
- (2) The verification of equivalence in the sense of § 1 (3) for the acquired knowledge and qualifications is based on the following criteria:

1. Level

The evaluation of the level should be based on the European or German Qualification Framework

(DQR) when the necessary description of the acquired skills is available. The evaluation of foreign language competency should be based on the Common European Framework for Reference for Languages of the Council of Europe (GeR or CEFR).

2. Learning outcomes or learning objectives

Equivalence should be determined based on the learning outcomes or learning goals, both in terms of contents and scope and in terms of requirements. A written or oral test of competence is permissible; the rules of the relevant Examination Regulations apply.

- (3) For the determination of equivalence, applicants must present appropriate documentation to the competent authority in the sense of §3 (2). Appropriate documentation here refers especially to certificates or other similar learning outcome-related documentation or competence-testing procedures of the educational institution. Learning outcomes and level should furthermore be documented through teaching and training syllabi of the institution and through documentation on the duration of studies. For competence acquired through professional experience, qualified work references or other references documenting practice must be submitted. The competent authority may request additional information, such as written exams, final works, work samples, reports or documentation, or a written assessment by the applicant of his level of mastery of the required competence.
- (4) Whenever possible, recognition should be undertaken at the level of the whole module. Otherwise, individual courses may be recognised. The grades of recognised courses and examinations are incorporated into the overall grade as long as the grading systems are compatible. When grading systems are not comparable, or there is no grade, the credit is marked "Pass." Recognised credits are indicated as such in the overall transcript of records.
- (5) If recognition is denied, applicants receive a notification that includes a notice on legal remedy.

§ 5 Competence

- (1) The decision to accept credits in accordance with § 2 and recognise non-university knowledge and qualifications in accordance with § 4 lies with the competent Department Examinations Committee of the respective School. The Examinations Committees may delegate this decision to their chairpersons or other qualified persons from the relevant School. In case of doubt, the School Examination Committee (SEC) decides.
- (2) The University Examination Committee (UEC) of the university and the Examination Office (EO) ensure uniform decisions, sufficient information for students and a transparent process within a reasonable period of no more than two months for their respective areas of responsibility. The administrative acts must be documented adequately. The responsible examination committees must ensure within their area of responsibility that the module handbooks are accessible to applicants.
- (3) The DEC or SEC and the EO shall report to UEC as required in accordance with Section 6.

§ 6 Competence of the University Examination Committee (UEC) for University-wide transfer and recognition issues

- (1) The UEC is set up for cross-school matters of recognition and credit transfer under the

chairmanship of the Vice Rector. Additional members may serve as consultants as required:

1. a member of the DEC or the EO (see § 5) who is familiar with the application, assessment and decision-making process; these representatives are appointed by the Academic Director upon request,
2. up to two additional representatives of the Central Administration appointed by the UEC Chair who have the relevant expertise and responsibilities.

(2) The UEC has the following tasks with regard to the implementation of this regulation:

1. to consider the reports of the Examination Committees or other relevant bodies of the Schools as well as of the relevant bodies of the central administration;
2. to develop proposals for the Academic Senate for the further development of these regulations as well as recommendations for legal implementation, which are geared towards a uniform decision-making practice regarding the recognition and crediting practice at the university;
3. to report to the Academic Senate as required on the recognition and crediting practices at the university and, if necessary, to communicate existing decisions of the Academic Senate on this regulation again to the Examination Committees, the Examination Offices and the students.

§ 7 Validity

These regulations enter into force with the decision of the Academic Senate on the GER including the appendices available at the time of the decision. A separate resolution is not required. With the entry into force, all previous versions lose their validity.

Appendices (pages 7-9)

- I. Application for transfer of courses, coursework, and examinations, recognition of non-university qualifications
- II. Modified Bavarian formula for the conversion of foreign grades

I. Application for transfer/recognition

Student's name	
Study programme	
Group number	

☐ **Transfer of university qualifications**

I have attached the following documents (please tick corresponding box):

- ☐ Module description
☐ Certificate
☐ Other explanatory documents (e.g. Learning Agreement, script, proof of qualification)

☐ **Recognition of non-university qualifications**

I have attached the following documents (please tick corresponding box):

- ☐ Copy of the completion certificate from the vocational school
☐ Copy of the chamber's examination certificate
☐ Other explanatory documents (e.g. syllabus, course description, confirmation by the training institute or employer)

Important note:

- Please discuss the possible extent of transfers/recognition in advance with the Head of Study Program
- Please make sure to hand in complete documentation (applicant's **burden of proof**).
- The application should be delivered to the examinations office of the respective School/Dep.

Please indicate the courses/qualifications to be transferred/recognised:

Designation/module title/qualification	University/institution	Evaluation/grade	Workload (in ECTS/SWS/hours)

Please indicate the courses/qualifications in your study programme to be substituted:

Suggestion for the course/qualification to be substituted * (module, course)	Workload (in ECTS/hours)

*For study programme-related stays abroad with a Learning Agreement: according to Learning Agreement.

Date

Student's signature

To be filled out by the lecturer:

Number of transferred ECTS	Grade (if transfer of grade is possible)	Name of lecturer responsible for the module	Signature of lecturer responsible for the module

Result of evaluation

- ☐ Yes, the transfer of course(s)/qualification(s) is accepted, including required coursework
- ☐ No, the course(s)/qualification(s) cannot be transferred; see justification
- ☐ The transfer of course(s)/qualification(s) is partially accepted; see justification

Justification

A denial must be justified with reference to the delivered documentation. For the denial of the transfer of university qualifications, the existence of significant differences in acquired skills must be justified. For the denial of recognition of non-university qualifications, the existence of significant differences in content and level between the knowledge and qualifications gained and the examinations that they would replace must be justified.

Date

Signature [Head of Department Examination Committee]

Rechtsbehelfsbelehrung [Legal information]

Gegen diesen Bescheid können Sie schriftlich, in elektronischer Form nach § 3a Absatz 2 des Verwaltungsverfahrensgesetzes oder zur Niederschrift **innerhalb von einem Monat** nach Zugang dieses Schreibens beim Examination Office der Departments/School Widerspruch einlegen.
*[You have the right to appeal this notice in writing or on the record to the School's Examinations Office **within one month after receipt** of this letter.]*

II. Modified Bavarian formula (explanation of purpose)

Modified Bavarian formula to convert foreign grades

Nmax: Maximum possible grade in the foreign grading system (see www.anabin.de)

Mmin: Minimum grade required for passing in the foreign grading system (see www.anabin.de)

Nd: Grade to be converted into the German system (best grade 1; worst grade 4)

The result is rounded down to the closest grade in the German system (e.g. 1.675->1.6; 2.46->2.4).

Nd = grade to be recognised – Result = grade to be entered
